Greeks Report Taking Italian Reinforcements

One Fortified Height After Another Is **Declared Seized**

ATHENS, Jan. 1.-Strong Italian reinforcements rushed to the Albanian battlefield in an effort to turn the tide against the Greeks were declared by a Greek spokesman

today to be meeting the same fate

as the troops they came to bolster-

capture and defeat. The spokesman said Greek charges were driving the Italians from one fortified height after another along the coast beyond Chimara toward the coast beyond Chimara toward the port of Valona in one of the On Germany, Belgium fiercest battles of the Greek-Italian

Fighting almost as severe raged And Netherlands in the mountainous Tepeleni-Klisura region to the northeast, it was said. There the Greeks reported encountering "stiff resistance" and breaking up Italian counterattacks

in fierce clashes for control of strategic heights.

Claims 500 Prisoners. "Five hundred soldiers and officers. belonging to fresh troops Italy sent Albania, were taken prisoner," the

tured in a communique Monday sector, in the central fighting zone. and reports from the Chimara zone said 1,000 had been captured there. The Greek high command's comtank was captured but did not say

on what part of the front said the battle along the coast had ing raged for five days, through snowstorms and cold, and that Italian Alpine veterans and ski troops were among the prisoners taken there. That drive toward the troop and supply ship port of Valona was said by some observers to have developed

into the main Greek offensive. Premier John Metaxas declared in 8 New Year message that the Greeks were ready to fight "to the last

No Raids on Greece.

"For this strife of ours-with ful confidence it is right—we pray to God to ask His help," he said. The Greek Ministry of Home Security reported there had been "no raids on Greece" yesterday.

Italian reports told of intensive air activity, skirmishes with British planes and the bombing of Greek man industrial area. No losses for

Reports reaching Belgrade last night said a British submarine attacked four Italian merchantmen convoyed by two destroyers in the sight of passengers on a Yugoslav coastal steamer and sank one of

the Italian commercial vessels.

Earlier, an Italian transport was reported sunk off the Yugoslav port of Bar, farther south in the Adriatic.

Reuters, British news agency, quoted Belgrade reports that a British warship had sunk four Italian transports, loaded with guns and motorcars, in the Adriatic yes-

Rome Reports Attacks Against Greek Outposts

ROME, Jan. 1 (A).-Fighting between British and Italian detachments in the battle of Libya and attacks against Greek outposts in Albania were reported today by the

Italian high command. The daily war bulletin also said in a raid on Valona, important Italian troop and supply base in Tarante.

Albania The high command's communique

On Message To. Congress

May Elaborate On Defense Talk; Lease Plea Indicated

3. the Associated Press. President Roosevelt ignored the holiday today to put in "the first real licks" on his annual message to Congress-an address awaited for a followup and elaboration of the policy he outlined Sunday in his defense talk to the Nation.

It was believed that Mr. Roosevelt probably would incorporate in this message on the state of the Union some material that time limitations prevented his using in his Sunday

Mr. Roosevelt himself indicated yesterday that the message would include a request to Congress for broad authority to lend war supplies to Britain, with perhaps discretionary authority to negotiate for repayment both "in kind" and in raw materials or other products.

The President's message to Congress-to be delivered Monday-was the next scheduled major administration pronouncement on the whole involved question of defense, British aid and international relations Meanwhile there was no slackening in developments in any of these

Defense May Be Unified. Further action for speedier arms production was reported under consideration. Mr. Roosevelt was said to be planning to concentrate in William S. Knudsen all the actual power of the newly-created office of

Reserve Board Acts To Protect Currency **And Avert Price Rise**

5-Point Plan Asks Repeal Of Presidential Powers and **Gradually Mounting Taxes**

The Federal Reserve System today recommended re presidential powers to revalue the dollar and issue "gree back" money, in a program designed to prevent the inflation-and

prices-which might result from huge defense spending. Also advocated among the proposals requiring congre approval was a gradual increase in taxes until the Federal is "balanced," or, in every-day language, until Governme collections can pay for the Government's expenditures.

Chairman Marriner S. Eccles, in making the proposal said it was purely of a precautionary nature. He added it had the unanimous approval of the I

vidual banks belonging to the Federal Reserve System. Briefly, the plan called for technical measures to prevent use of most of the \$7,000,000,000 idle money now in banks for excessive loans; a reversal of administration policy in some monetary fields, and, finally, the eventual balancing of the Federal budget through higher

By King George to Head Honors List

Four New Barons and Three Baronets Are Created in Britain

By the Associated Press. LONDON, Jan. 1.-King George VI selected Lord Camrose, 61-yearold owner of London's conservative Daily Telegraph and Morning Post, to head his New Year honors list

Lord Camrose, now a baron, was made a viscount

The list, the second of the war, also created four new barons and many fields of endeavor, in which airplane, arms and ship production were prominently represented.

It was the eighth honors list of the monarch's reign The new barons created were: Field Marshal Sir William Edmund

Ironside, 60, former chief of the imperial general staff and former commander of the British home forces. Lord Hugh Cecil. 61, churchman and member of the distinguished Salisbury family, and provost of Eton since 1936.

Kindersley in List.

Sir Robert Kindersley, 69, who started work at 15 for 10 shillings a week and lately captained Britain's voluntary war savings campaign, raising more than 475,000,000 pounds sterling (\$1,900,000.000).

Sir Boyd Merriman, president of the Probate, Divorce and Admiralty Division of the High Court of Justice, which decides the fate of seized enemy" ships and cargoes. He was the judge who gave the present Duchess of Windsor her divorce from Ernest Simpson on May 3, 1937.

Neew baronetcies went to Sir William Coxen, 73, former Lord Mayor of London, who raised 5,000,000 pounds sterling for war charities; Sir Kenneth Lee. 61, former director general of the Ministry of Information, and Hugh Lett, president of the Royal College of Surgeons.

The long list, filling 86 columns included many naval and Royal Air Force recipients of awards. Among them was Lord Louis Mountbatten the King's cousin, who was created companion of the distinguished service order.

Commanded Flotilla.

Commanding a flotilla, he brought non-existent line for a non-existent the destroyer Kelly safely to port in May after she was crippled by a torpedo and attacked by German warplanes. Hereditary Fighting In Rats Studied as **Guide to Mankind**

Scientists Are Told That Possibly Same Law Of Inbreeding Applies

By THOMAS R. HENRY, Star Staff "orrespondent.

PHILADELPHIA, Jan. 1.-Evitary among rats - and possibly among men who are subject to the same general laws of hereditary-Dirty-faced, swathed in blankets was presented by Dr. J. P. Scott of and unharmed but trembling from Wabash College before the American Association for the Advancement of Science here today.

He obtained rats from two closely up to safety at 8 o'clock last night, inbred strains which had been used in cancer research. Into cages with male rats of several such strains he placed strangers of the same breed. he same section escaped when tons | The reactions were distinct and speof slate and rock collapsed at Mon- cific in each instance. In one case there was a rapid appearance of anger in the rat whose cage had been invaded. He "sized up" the miles below the mouth of the drift stranger and then attacked. Almost this exact behavior was duplicated in 10 different experiments with this particular breed. In another case the host rat was a model of hospitality. He "gave the intruders a thorough nosing-over which seemed to be very similar to grooming. One male actually washed the stranger's

head. They often followed the strange mice around as they investigated the pen. Fluffing of hair and labored breathing suggestive of anger were not observed. They attacked but in two cases seemed to fight back. In reply to aggressive nudgings they turned and

able to extract more from what This "turning - the - other - cheek" behavior, Dr. Scott said, was nearly identical in eight experiments with this specific breed. With other sorts of intermediary behavior be-

tween these two extremes. Reasons Toward Racial Line. The behavior of the two extreme stocks. Dr. Scott said, varied fundamentally in four respects-the nature of the approach to strangers the distance maintained from them the internal chemical reactions which produced hair fluffing and labored breathing, and the actual aggressiveness. If these four traits were distributed at random in the "The walls began to crumble and hereditary make-up of the rats in in eight animals would be only one in 256 and the chance of getting all rapped), but I guess they couldn't four of them would be about one in hear. Then we hustled to safety a million. Hence, he concluded the

racial line. "One is tempted to apply this conclusion to human beings," he said. In the case of inbred mice and men the hereditary mechanisms appear to be the same, but the social every one the best of luck and He Man Pays \$62.80 to Win behavior and the system of breeding are very different. The effect of close inbreeding is to fix a combination of genes which includes a band will play many recessives. Even allowing for increased genetic variation caused relaxation of selection in certain concluded that genetically caused differences as extreme as those first winner of the new found in the social behavior of to come from the Masonic Home at year. Dashing to the front in quick inbred mice should be rare among

New York's Welcome To 1941 Is Gayest In Recent Years

Times Square Jammed As Merriment Reigns All Over Big Town

By the Associated Press. NEW YORK, Jan. 1.-Hundreds of thousands of merrymakers-maybe a million, or even more-jammed Times Square this morning and cheered in the New Year.

On the stroke of 12:01 a.m. the big illuminated ball on the Times Building dipped to signify that the new year had arrived.

On the Times' famous electric bulletin board at that very minute flashed the news-"The United States Fleet will abstain from maneuvers and will be held in Hawaiian waters"-

Mounted Police Watch.

Flash bulbs illuminated the happy merrymaking and apparently lightdrinking throngs, and mounted police officers were marooned astride their steeds, jammed against the iron fence that divides Times Square, unable to move, direct traffic or do anything else but watch the proceedings.

From the great square, in the middle forties, to the middle eighties, east and west, merriment reigned. Couples danced in the streets-to the tunes of portable radios-to make it the gayest New Year celebration in recent years.

in street corners-unable to obtain reservations in night clubs-debating where to go and wondering how Radio Stations Quit much it would cost.

Uniforms Add Somber Touch. Soldiers and sailors in uniform added a somber touch—the first such angle observed in a New Year celebration since the World War, but they, too, joined in the lighthearted, happy-go-lucky spirit of the occasion.

Most of the city's 7.000,000 souls celebrated in private neighborhood wassail, but the spotlight fell as usual on the few hundred thousand who elected to brave the buffets, physical and culinary, of the Great broadcasting any of the 1,500,000

American and British Envoys Join Chinese In Welcoming 1941

Nazi and Fascist Officials Also Attend Party at Chungking Hotel

By the Associated Press.

CHUNGKING, China, Jan. 1 .--United States and British Ambassadors and high officials of the German and Italian Embassies joined Chinese leaders today in a snake dance which welcomed 1941, the Zodiac calendar snake year, and for the Chinese symbolized their hope to return their government to Nanking before the year

Leading the twisting line of dancers in Chungking's largest hotel were Dr. H. H. Kung, Chinese Vice Premier and minister of finance, and Gen. Ho Ying-chin,

Near the head of the line were the Ambassadors from the United States and Britain and farther down the line the German and Italian Embassy members.

The Chinese leaders echoed a prophesy by Generalissimo Chiang Kai-shek that fighting between Chinese and Japanese forces would end in 1941 in China's favor.

Sees China Victorious.

Chiang said in a speech broadcast to China and the United States that "1941 will be the final, decisive year in which China will fulfill her destiny in the present struggle against Japanese aggression."

He said President Roosevelt's speech Sunday night "extraordinarily stimulated and encouraged" the Chinese, and added:

"China, peace-loving by nature, will make a great contribution in the future to world peace.

Foreign Minister Wang Chung-hui expressed hope the United States would cut off trade with Japan and predicted such action would cause the Japanese war machine to "collapse like a house of cards."

Grateful to Americans.

"The Chinese government and people are deeply grateful to the American people for the just and righteous stand they have taken in the Sino-Japanese conflict," the Chinese Foreign Minister said in a New Year message broadcast today from Chungking to American listen-

"They cherish the hope that the United States, as a power vitally interested in the Pacific, can see its way clear to co-ordinate the American-Japanese commercial relations with its foreign policy toward the

"The Japanese depend upon their trade with the United States to replenish their rapidly exhausting sinews of war. Once this source of of cards. And I am hanny to say appears to be the trend in

3 Die as Santa Fe Freight Goes Over 150-Foot Bank

DEL MAR, Calif., Jan. 1.-The locomotive and 17 cars of a Santa e freight train plunged over a 150embankment one-half mile south of here last night. Three trainmen were killed. The engine and nine cars piled

up on the beach at the foot of the street N.W. The father, Sam Ackcliff, but eight cars catapulted into

The dead: Glen A. Dunham, the engineer; C. W. Waldon, fireman, ing after the night before with a and H. A. Williams, head brakeman, number of drunks and disorderly all of Los Angeles.

Darkness hampered wrecking crews. Railroad officials said it was charged by police in the new year doubtful if the line could be opened for 24 hours.

England's Situation Admittedly Grave, **Newsmen Say**

Ships Greatest Need, Correspondents on Way Home Report

By the Associated Press.

NEW YORK, Jan. 1.-England's situation in her war against the axis powers, while far from desperate, is admittedly grave, three Associated Press correspondents, who have gone through the entire battle of Britain, agreed yesterday on

their arrival in New York. The three, William G. McGaffin, Dwight L. Pitkin and Taylor Henry, who left England December 17, reached New York on the American Export liner Siboney.

In a three-point analysis of Britmin's position as the old year ended, the correspondents stressed that

1. Britain's greatest need is not airplanes, but merchant ships and destroyers to protect them against German and Italian surface raiders, submarines and coastal bomb-

2. Continued German blitzkriegs against British cities have done surprisingly little damage to Britain's essential war industries

3. British confidence in ultimate victory with American aid, far from being shaken by the punishment her cities have taken, has been strengthened 100 per cent by the Italian defeats in Greece and Libya.

Raiders Take Heavy Toll. "The surface raider and submarine have become a far greater

menace to Britain than the night blitz bomber." said Mr. McGaffin, a native of David City. Nebr.

"While the food situation in Britain is nowhere near as serious as taking heavy toll of convoys bringing needed imports to the embattled island.

"This, of course, adds up to a cumulative loss of merchant bottoms, but even more serious is the lack of warships to convoy the merchantmen.

"For example, as we passed through Bermuda we saw a convoy of 18 vessels assembling. As possible protection there were only one armed merchant cruiser and

two destroyers. "From a food point of view, it is fortunate that the British have stored stocks reported in wellinformed circles to be sufficient for

vinced they are better than his own. His principal military advisers are Gen. Alfred Jodl and General Field Marshal Wilhelm Keitel, chief of army high command.

Jodl is a comparative youngster with many iresh ideas appealing to Hitler. During the course of the war Keitel has become increasingly close to him because of his capacity for using drawings to clarify complex

military situations. Remembers Wealth of Details. Close associates say Hitler has an

almost limitless capacity to absorb and remember details and that he often confounds his own advisers by recalling even the most technical

Night finds him continuing his study, in recent months more especially, of military problems. Before the beginning of the western front campaign last spring, his work desk each night was a tangle of military maps and texts from which he studied battle plans reaching back as far as a thousand years.

Hitler likes the opera, vaudeville and the movies. He especially is pleased with one love story filmed in Bavaria and called "The Naughty Village." His favorite composer is

Richard Wagner. He plays no games of diversion,

follows no sport. He detests closed cars, rides only in open ones and most often sits up front beside the chauffeur.

His personal exercise is limited, out he burns up a tremendous amount of energy on the job. He enjoys an occasional walk in the chancellery grounds or out on the street in the evenings. He prefers to walk alone, although frequently and speeches for the most part into in his Reichschancellery strolls he is accompanied by diplomats and

Copper Export Curb To Protect Defense **Supply Considered**

Restriction Weighed as 1940 Reveals Heavy Purchases by Japan

BY GARNETT D. HORNER. Government officials are considering action to restrict exports of copper, one of the essential war erlands East Indies, rich in oil. materials, which Japan bought here in increasing quantities during 1940, it was learned today.

Members of the National Defense Commission were said to be concerned over the possibility that continued unlimited foreign purchases of the metal might interfere 22,296 pounds in the previous fit for Army service. with defense production here. Heavy buying of American gaso-

line by Japan, apparently striving to build up her reserves in fear that this supply might be cut off entirely, also was said to be viewed with some concern. While it appeared likely that cop-per may be added to the list of

strategic materials which cannot be shipped out of this country without a special license, no additional restrictions on gasoline exports were expected in the immediate future. Military Gasoline Policed.

Copper is one of the few materials of major military importance which does not require license to export. Most grades of gasoline of military usefulness already are subject to the license requirements, largely accounted for by a ship- were used in England in the last with a complete embargo in effect ment of radio compasses, which the year.

of defense officials.

The gasoline which Japan has been buying in greatly increased quantities during recent months was of the lower grades, shipped under license, officials said. Alof gasoline, such a step is considbility that Japan might use the to only \$8,000. closing of the market here as an excuse to attempt to seize the Neth-

Doubles Copper Orders. Japanese purchases of copper here last October were more than

double those of the previous month and of October, 1939, amounting to 20.762 pounds in September and October. A sharp decline was reported for November, however. Copper exports to all countries amount-11 months of 1940 as compared was pear. 678,768,000 pounds for the similar period of 1939.

Gasoline exports to Japan rose from 549,000 barrels last September to 627,000 barrels in October, as compared with 148,000 barrels October, 1939. For the first 10 months of 1940 they amounted to 1,749,000 barrels as compared with 825,000 barrels for the same period

of 1939. Gets Obsolete Radio Compasses. Meanwhile, officials said a big jump in the value of aircraft parts exported to Japan last October was

Vatican Guard Will Get Guns Century Old

VATICAN CITY, Jan. 1.-The Vatican's fur-helmeted Palatine Guards are to be given "new" guns as soon as they can be cleaned of the

last century's rust No reason was given by Vatican sources for replacing the guards' modern rifles with an 1840 model of the muzzle-loader which Napoleon found effective except that it apwish to restore the uniforms and equipment of antiquity.

Two men are needed to handle the "new" gun, one to fire it and the other to reload. Ballistics experts say it can carry 1,000 yards.

The Palatine Guard, as it now exists, dates back to Pope Pius IX, who decreed in 1850 that the Vatican's two bodies of militia, the Civici Scelti and the Capotori, should be united in one and called the Guardia Palatina D'Onore.

Six hundred thousand horses were used in the great fall plowing campaign in Britain.

Typewriter's 'M' and Hyphen, Plus Patience, Reproduce Art

THE GREATSEAL

of the

UNITED STATES

The great seal of the United States, as fashioned on a typewriter by Miss Sidonie Ebbecke. Miss Sidonie Ebbecke has not been to work on a desk-size white blotter.

content to regard the typewriter Hopefully, but not confidently, she only as an instrument for placing attempted to shade the production common patience.

Miss Ebbecke, instructor in a local shorthand school, has produced but coln if I find a good picture of one work of typewriter art-a representation of the great seal of the United States. This result of 13 hours' work has prompted so many favorable comments, however, that she says she hopes to type out other pictorial items when sufficient spare time comes to hand.

Miss Ebbecks says it's relatively simple and "something like crocheting." To produce the great seal, she explains, painstaking work with a magnifying glass on a small picture of the subject was required. The typewriter artist translated proportions of the seal into the number of "Ms" and hyphens required on each line—for only the letter

Civil Service Examinations Announced. Touch Typing FREE with course. Other popular calculators: Burroughs. Monroe. Marchant. Friden. and all adding machines. Day-Night classes. New classes. "M" and the hyphen were used.

How does one "draw" on a type-

Using an old typewriter with a 32-inch carriage, Miss Ebbecke went 1333 F

words and figures on paper. She by varying the impact of her fingers has experimented in leisure hours upon the keys. The effect was surand has established that the machine also may be used to "draw"
pictures—if one is possessed of unwork is worth the hours she devoted

to it. "I may try to do Abraham Linhim," she says.

Still a Bad Record

On page A-12 of today's Star there is spread the ugly record of traffic deaths in 1940. Study it. The fact that there were five fewer deaths in 1940 than in 1939 provides a minimum of comfort. For eighty traffic deaths on the streets of Washington during a single year is still a terrific penalty to pay for the luxury of automobiles.

The Star presents the factual analysis of the year's traffic toll with one purpose in mind. If readers will study it, many of them will discover the chief cause of death on the city's streets and, discovering it, will avoid the danger thus established.

The chief cause of death this year remains the same. It is to cross a street at some point other than the intersection. If that hazardous undertaking had been avoided in the year just ended, traffic deaths would have been reduced from eighty to fifty-five. Twenty-five persons who are mourned today would be alive. And if that hazardous undertaking could be avoided in 1941, many would be alive next January who otherwise are now condemned to die.

Pedestrian regulation is a subject of lessened but continuing controversy. A great many people rebel against it, heaping the blame on the automobile and refusing to surrender a right to cross a street when, where and as it pleases them.

They may be right, and die in defense of this right. The point is, however, that if they prefer to stay alive, the safest thing to do in modern city traffic is to cultivate this habit and stick to it: Cross the street at a cross-walk.

More Bases Needed

Even when construction of the eight new Atlantic naval and air bases is completed, there will be certain weak spots in our chain of outer defenses. Some of these chinks in our armor were outlined to the American Association for the Advancement of Science at its convention in Philadelphia yesterday by a university professor and by a naval officer. Other deficiencies were indicated in a North American Newspaper Alliance article on Martinique. strategic French island in the West In the light of President Roosevelt's warning of last Sunday night that long-range bombers have narrowed the oceans and that an axis victory would mean that America must live with a gun pointed at her, the renewed discussions regarding the need for strengthening still further our ring of fortified outposts

Last October Colonel Charles Lindbergh, in a Nation-wide broadcast, scoffed at the possibility of an aerial invasion of this hemisphere by way of "the ice-bound mountains of Greenland." But Doctor William H. Hobbs, veteran Arctic explorer, on the faculty of the University of Michigan, is convinced that Greenland possesses tremendous military potentialities. He told his fellow scientists that a German meteorological station has occupied since 1930 the site of a possible landing field on Jamieson Land, halfway up the east coast, and he described an uninhabited ice cap, far inland, the smooth expanse of which would make an ideal base for an enemy air fleet. He mentioned other likely sites for air or naval bases. Greenland, well within the American defense zone, is one of the northern stepping stones from Europe to America, the others being Iceland, now defended by Canadian troops, and Newfoundland, on which American base facilities are being constructed as an outgrowth of the destroyers-for-bases deal with Eng-

Captain C. S. Bryan of the Navy called attention of the scientists to dangers which exist to the south of us-in the vital Panama Canal area. From Antigua, where one of the new Caribbean bases is being laid out, to Saint Lucia, site of another proposed base, there is a gap of two hundred miles of ocean. Between these bases lies the Vichy-controlled island of Martinique. The United States manifestly could never permit this island to fall into enemy hands. In the series of articles on Martinique, written for the North American Newspaper Alliance by Stephen Trumbull, and now appearing in The Star, the importance of this French possession in the scheme of Caribbean defense is clearly shown. But it is on the Pacific side of the Canal that Captain Bryan sees a special threat to our security. He pictured the possibility the Canal by way of the Galathe Gulfs of Dulce, Nicoga and Fonseca, on the Pacific coast of Central

America. additional bases in both oceans for better protection of this continent demands the continued attention of our naval and military experts, of administration leaders and of the forthcoming Congress.

New Year

The pitiful story of the year which ended at midnight was written in blood and tears. Burning cities were its milestones. The destinies of seven independent nations passed into the cruel hands of German warlords. Three other states were absorbed by Soviet Russia. Finland, after gallant resistance, paid with valuable territory for the privilege of maintaining her honor unsullied. Later, a series of incredible victories over Italian invaders gave modern Greeks the right to be regarded as comrades of their heroic ancestors of Marathon and Salamis. China, meanwhile, continued to defy Japan to the amazement of friends who had not dared to hope for further effort in the name of freedom.

Naturally, the impact of events in Europe and in the Orient was felt in the Western Hemisphere. The threat to the democratic theory of government grew with the passing of each hour; and the United States, strengthened by the experience of a presidential election in which every good tradition of ordered liberty was given solemn expression, set an example for neighboring republics by adopting a program of national defense including conscription. A popular determination to assist all those countries struggling against totalitarian aggression was put into words by the chosen leader of the American people within a few weeks after he had received the mandate of the voters to "carry on" for a third term in office.

Some sacrifices necessarily were involved in the policies accepted by those who refused to bow to axis tyranny. England especially suffered a fearful martyrdom beginning at midsummer when Adolf Hitler loosed his air armada for the destruction of London and the devastation of a lengthy list of lesser towns in which thousands of courageous men, women and children made their homes. The dwellings of these multitudes were blasted from the skies, yet the spirit of the average Briton never wavered. After months of bombardment the Nazi raiders still had failed to gain the advantage desired by their master. They did not control the air. Neither could they claim to govern the seas. The osses inflicted upon merchant shipping were impressive, but the ultimate triumph of German arms few persons imagined could be won by furtive submarines.

Fifteen months after the conflict began, President Roosevelt, basing his judgment upon the latest and best information available, declared his confidence that the democracies would not be defeated. To insure their success, he urged the development of the United States as an arsenal for the production of weapons and munitions to turn the scale for liberty. So 1940 ended with the formulation of a plan equal to the imperative requirement of civilization, if only it be accomplished in

terms of unquestionable fact. An important philosophic principle also has been demonstrated during the year that now is dead, and it should be mentioned at the moment when another calendar is begun—namely, the resilient quality of the human mind, the human heart, the human soul. Mankind has suffered a frightful ordeal and even more painful trials may lie ahead. Yet no one surrenders. There is less defeatist talk now than there was before the start of the second Armageddon. Because their cause is just, because they truly love freedom, because they want a tolerable system of society in which their fellowcreatures are not slaves, because under God they wish to live in peace and share an honorable prosperity and not exist in constant turmoil, the unspoiled communities of this earth enter 1941 unafraid. For that they thank their Maker, praying to deserve His support in their valiant

No Strikes at Panama

The assurances given by William C. Hushing, chairman of the National Legislative Committee of the American Federation of Labor, on his return from Panama this week, that labor troubles will not halt defense activities in the Canal Zone, is heartening news. When strikes were threatened on several projects, President Green sent Mr. Hushing to Panama. Promising that their complaints will be ironed out in Washington, he told the workers that they must stay on the job. President Green and Mr. Hushing are to be commended on their efforts to prevent any interruption in the program to strengthen the defenses of this

vital seaway. Other labor leaders could follow profitably their example when disputes arise, and insist that defense industries continue operation, without a stoppage of work. This should have been done, irrespective of the merits of the controversy, at the International Harvester Company's truck works at Fort Wayne, Ind., which manufactures parts for Navy vehicles. The Automobile Workers of America, C. I. O., called a strike there of a successful naval-air assault on on Tuesday. In defense plants, the interests of the Nation clearly tranpagos Islands or the western coast scend those of either management or

the Galapagos and naval facilities in at Fort Wayne and elsewhere, can be reconciled through arbitration or conciliation.

As the President pointed out in The whole problem of obtaining his address on Sunday, the Nation "expects and insists" that our factories continue to produce war supplies, free from strikes and lockouts. With vastly increased output urgently needed, if this country is to render its full potential assistance to Britain in her battle for survival, strikes have no place in our war industries today. National unity, so essential in the present emergency, requires teamwork and spirit of give-and-take by both labor and management.

The Issue Takes Shape

German reactions to President Roosevelt's Sunday night address clearly foreshadow the basic issue between this country and the axis powers which may be expected to take definite shape during the com-

All present indications point to the conclusion that the war is going to become a desperate race against time, with the Nazis and their Fascist allies striving for a decisive victory before their present superiority in armament can be neutralized by increased shipments to Britain of fighting equipment produced in this country.

This is implicit in Hitler's New Year message to the German soldiers, in his assertion that "armed as never before" we stand at the door of a new year—a year that "will bring our history." And it is still more evident in a statement attributed by the Associated Press to an unidentified Nazi spokesman who was quoted as saying that the President's speech was uninteresting because "American support of England, no matter in what form it comes, cannot delaymuch less prevent-Britain's defeat."

It is here that our real-clash with the axis—if there is to be a clash will come. At present, the war supplies that Britain is securing from this country are not, in Germany's judgment, sufficient to affect decisively the trend of the war. The Nazis, presumably, are counting on delivering a knockout blow this spring, and if that can be done, their belief that there is little this country can do to prevent it is well founded.

But an entirely different face will be put on the matter if the spring drive fails. In the months that follow there will come a time when American assistance to England begins to assume decisive proportions and when that point is reached we may expect the Nazis to avail themselves of every means at hand to interfere with our production and to prevent American - made materiel from reaching Britain. Just what the Germans can do in this direction, in addition to the efforts already being made, is not clear, for it is obvious that they cannot make a direct attack against this country while the British are still fighting. Despite the obstacles to effective action, however, it may be taken for granted that the present German attitude of indifference would be abandoned in favor of a program embracing all counter measures that seem to offer any hope of success.

And that, paradoxical though it may seem, is an attitude that should be welcomed by us, for it would signal the approach of the time when we could be sure that our efforts to check the forces of aggression were beginning to bear fruit. In working toward this goal we must not be turned aside by Hitler's present disclaimers of any purpose to dominate the world, an assurance made worthless by his past record of broken pledges, nor by the undisguised attempts at intimidation which the year 1941 may be expected to produce.

Business Outlook

Forecasts on the national business outlook for 1941 are highly optimistic. Many of the predictions are based in part on recent sharp gains in important economic indices, advances which are expected to continue far into the year.

Domestic and foreign armament building will move forward at a sensational pace in 1941. Rising pay rolls will lift buying power to new heights, which in turn should mean an upswing in retail trade above the high marks already set last year.

Economists point to recent upturns in national business barometers as indications of improving conditions. Industrial production is climbing steadily. Motorcar output, railroad freight traffic, steel activity and coal and electric power production, except for seasonal changes, are shown to

In several respects these levels of business already rival the highest peaks on record, but experts foresee no serious halt in the upward movement for many months, possibly for two years. Immense Government contracts let, or to be awarded soon, are considered the forerunners of a national industrial boom. Tax problems, however, make difficult any definite predictions as to profits. Such factors as halting of the war and exorbitant labor demands might affect the business picture. But at the moment, regardless of uncertain foundations, this country faces prospects of prosperity in 1941, a prosperity in which Washington

will share to a high degree. Remember the tender flower of vestervear who could not bear the feel of cotton, lisle, or even coarse silk on her lower "limbs"? Well, she is wearing heavy ribbed woolly ones now, and just loving it.

Marshal General von Brauchitsch pagos Islands or the western coast of South America. The best defense against such an attack, he said, would be an American base on south a management or labor. Adequate machinery is at south an attack, he said, would be an American base on south a management or labor. Answers Food Plea Of Mrs. Lindbergh

Says Injustice to Britain Is Involved in Proposal To Feed War Victims

To the Editor of The Star:

Anne Lindbergh's radio appeal of December 24 for food to be sent to the peoples of the conquered countries of Europe may arouse dissenting voices and the feeling that her advocacy of the project is not altogether reasonably based.

Mrs. Lindbergh defends her stand at one point by stating: "To act in the spirit of Christian mercy is a good business." Yes, it is a good business: it is even more than that: it is the duty and privilege of every man, woman and child to act in the spirit of Christian mercy. However, that which is called an act of Christian mercy sometimes may be open to a different interpretation. One great example of Christian mercy, often referred to, is the story of the Good Samaritan related in the New Testament. The Good Samaritan, according to the Biblical account, did not merely succor the wounded man, found lying by the way side, with a little food and then, in selfrighteousness, continue on his way. No we are told, he bound up his wounds, and carried him to an inn, and took care of

Today, in the name of Christian mercy, what is the Good Samaritan role that Mrs. Lindbergh and the groups she sponsors would play in the distressed areas of Europe? Would they aid these suffering peoples by any attempt to liberate them completion of the greatest victory of | from the bonds that fetter them and make them an hungered? No, cry Mrs. Lindbergh and many members of these groups, we must do nothing that will risk our own comfort, our own peace, either for these or any other peoples; we will merely send over food. No-they would take a safe way, an easy way of being heralded as the world's great humanitarians.

And what of the real spirit of Christian mercy? Is it included in this proposed venture? An act of Christian mercy may be defined in part as an act which accrues to the benefit of or affords a blessing to all concerned. Therefore, any act which does not accrue to the benefit of all, which includes in its performance an injustice to any person or persons, may be said to cease to be an act of Christian mercy.

The proposed sending of food to these Europeans does direct an injustice toward England. It may be only a potential injustice, but it is there. The injustice is that in proportion to the food we send to these conquered peoples just in that proportion do we enable Hitler to seize whatever of food these peoples may have stored or whatever they may produce, even though he does not actually confiscate the food we send over. We would therefore not only make it possible for him (Hitler) to tighten his hold on these unfortunate peoples, but we would also strengthen his position against England and jeopardize the effectiveness of her blockade, a blow which this be-

Again, concerning negotiations which she asserts England is making, Mrs. Lindbergh states: "These facts go to substantiate one's belief that the English people . . . do not want to starve the people of hitherto democratic nationsif a practical way out can be found. Mrs. Lindbergh's insinuation is that England probably wants to starve the peoples of the hitherto democratic nations and does not share our own noble desire to be of help to them.

England want to starve these people? England in whose self-sacrifice, courage and valor, lies their only hope of liberation from the bonds that enslave them? No. England does not want to starve these people. England is doing that which we will not do; that which Mrs. Lindbergh is particularly loud in protest that we shall not do: England is sacrificing and risking her all, in untold blood and suffering, that these people as well as herself may be free; that we may be free; that our world may be free.

It appears unseemly that we, who will take no risk whatever in behalf of other peoples, should so arrogantly demand that what we are pleased to call our benevolent plans-made at no risk to ourselves-should have the right of way, even to the point of aiding the enemies and lessening the effectiveness of the defenses of a people who are not only willing to make but are making the

Let us be honest. Let us not try to delude ourselves and others with the idea of what great humanitarians we are. Let us, when we are unwilling to take any risk ourselves in behalf of other peoples, at least take no step that will even remotely hinder or place a greater burden on those (the British in this instance) who are giving their all that the things we hold dear-life, liberty, and the pursuit of happiness—shall not perish from ALIDA BEALE.

Believes Californians Differ From Senator Johnson. To the Editor of The Star:

We learn today that Senator Hiram Johnson has said: "I am off to the wars!" Ain't that a relief? We all had believed he wanted China to do the fight-

ing for him and for his State. Let China be assured that Californians are not all Hiram Johnsons and that President Roosevelt's speech of vesterday. is nailed over California hearthstones as JOHN STUART THOMSON.

Glen Rock, N. J.

Objects to Stamps Showing Cannon On Christmas Greeting Cards. To the Editor of The Star:

Has any one else noticed that the new 2-cent defense postage stamps with their bristling guns were put on sale just before Christmas? While every one is defense conscious, the use of warlike postage stamps on Christmas card envelopes did seem a little incongruous. A message of peace and good will inside the envelope . . . a threat of conflict on the outside. JOHN L. CATON.

Praises "Young People" In Shops at Christmas Season. To the Editor of The Star:

Now that the Christmas season is nearly closed, I want to pay tribute to the thousands of young women working in our shops and places of business, who

have served us so well. Never in any walk of life have I met with greater kindliness or willingness to

THIS AND THAT

Just as we were trying to think what | She evidently sees no excuse for being to write about today, the cat Penny came and rubbed her head against our

She leaped up lightly onto the typewriter table, wound gracefully around the machine, poked her head through the curtains, chattered at the squirrels at the bird feeding station down in the

Penny was determined to be helpful. As the typewriter began to clack, she began to stick her paw into the rods which propel the keys.

A rather good rap decided her against this sport. But she was in a playful mood. Nothing daunted, she then made a wide, wild leap from the table to the floor, then pretended that she was after a mouse. * * * *

What started her on this spree was not catnip, but simply the wholesale rearranging of furniture which had taken place in the living room the day before

Womenfolk say it is a good thing to change the furniture around every now and then. It makes old things look, if not new

(which is impossible), then strange, odd, unusual. To see the old lumpy dayenport (20 years to the making of its lumpiness)

standing at right angles to the fireplace. when it had done duty in front of the three windows for so long, was to get an entirely new conception of the usefulness of old davenports. This rearrangement, the most drastic

of the day, struck the cat Penny as altogether unnecessary. Had she not used the davenport for a

ready observation post? * * * * There she had peered into the street to watch the altogether fascinating array of dogs, squirrels, automobiles and per-

sons which and who went by The squirrels were the most inter-

esting. They deserved to be caught. Penny told the world with switching tail.

All squirrels, her level mouth and staring eyes indicated, deserved the one fate which nature holds in store for such animals.

That is, they deserved to be caught, along with mice and other small deer, as Shakespeare said. Penny and Shakespeare agreed on this.

Persons who have housecats know where the expression, "The female of the species is more deadly than the male," came from. A tomcat may be lazy, when it comes to catching mice. Many of them even refuse to catch

* * * *

But not the female cat. It is her business, ancestrally, to catch a supply of food for her young, and nothing ever makes her forget.

Penny chatters away indignantly at Yes, on the whole, she approves highly squirrels and birds, especially pigeons. of the change.

By Charles E. Tracewell.

for them. Her main concern over the removal of the sofa, however, was with it as a

secure hiding place against the trash-It was not so much that worthy, in

himself, as his vehicle. It needed new brakes.

Whenever his car drove up, there was a long wailing shriek.

It could be heard a block away, and Penny never missed. She had never seen the trashman, He had made no movement in her direc-

But she did not like that shriek. Every time she heard it, she made a dive for the davenport, to a point in the rear where the webbing had sagged, along with the cushions. Into this opening she went, to hide

in the sofa interior until all danger of the trash wagon was over. Sometimes she remained in this hide-

out for an hour.

At other times, for perfectly good cat reasons, she came out inside of 10 or 15 minutes.

* * * * Nobody knows why she fears the big wagon and its noise.

She does, that is all, and the couch to her is safety. The first time she popped into it

no one in the house could explain the mysterious disappearance of the small She was gone, that was all. That

she could get inside the davenport was an unknown fact. But like so many mysterious things, the disappearance was easily explained, once you saw her

emerge Call "kitty, kitty, kitty, kitty," etc., as long as you pleased, there was

Then, turning, there she was

The first visit of the trashman after the rearrangement was awaited with in-

Would Penny seek her old place of concealment in the springs?

It is needless to say that she did, but this time she came out in short order. She wanted to play her new game. This is to run through the dining

room at top speed, then to leap to the end of the sofa without stopping except to dig in her claws and make a wild turn to the left.

This maneuver is exactly on the order of the automobile racers at the Indianapolis track.

They call it banking.

Penny doesn't know it is called that, but she does it, just the same. Instead of four wheels, she is on four legs, and instead of rubber tires she has padded paws with claws.

It is these claws which enable her to bank so gracefully. In another wild neon signs floating in a tank. They have leap she is over by the front door.

Letters to the Editor

Discusses Plight of W. P. A. Workers Who Want Private Employment.

To the Editor of The Star The recent official warning to W. P. A. workers to accept jobs in private employment and the usual widespread publicity that tends to foster the general belief that W. P. A. workers do not want regular employment, should be answered. No other group of Americans is so consistently belittled and misrepresented. They have no true representatives to present their case to Congress or to their fellow citizens who are favored with regular employment. The loud-mouthed Communist organizations do not represent them because W. P. A. workers reject communism as completely as other Americans reject it. But, being unemployed, and therefore, somewhat afraid to strike back, W. P. A. workers have been booted about like a football in what has become another kind of

American sport. This social attitude toward W. P. A. has had the direct result of hampering the re-employment of these people in private business and industry. If W. P. A. workers are lazy and do not want private jobs, then, of course, employers do not want to hire them. And because of this widespread belief, notwithstanding the monumental evidence on every hand to the contrary, employers have been, and still are, refusing to hire W. P. A. workers. It is a vicious circle.

W. P. A. workers want regular work. They want private employment. They are anxious for work and they are constantly striving to get it. This fact is evident to all who really want to know the truth. They crowd around employment offices, rush to the camps trying to get defense jobs, crowd into every civil service examination for which they can qualify, and even advertise for work in the newspapers.

The comparatively few people on W. P. A. who are not trying to readjust themselves to normal living are really too insignificant to stigmatize the entire group, thus threatening the already slender chances of private employment. These are the ne'er-do-wells who were ne'er-do-wells even during times of the greatest prosperity. They constitute a small cross section of the Nation, always did, and they will still be on some kind of relief, public or private, long after W. P. A. is gone. But W. P. A. workers generally, people from the regular working forces of America, must not be typed by these few ne'er-do-wells.

Why aren't the W. P. A. rolls decreasing as national defense work expands? The answer has already been given. Employers, influenced by the public attitude, are turning W. P. A. workers down. Some W. P. A. workers are finding regular jobs. Not all employers are hostile, nor do all take advantage of human suffering. But, on the whole, business and industry have failed to cope with unemployment. The problem has grown so large that I doubt whether private enterprise can solve it. CHANCELLOR WILLIAMS.

Differs With Senator Wheeler

On Lending Gun. To the Editor of The Star:

Coming from a less influential person than United States Senator Burton K.

Letters to the Editor must bear the name and address of the writer, although the use of a pseudonym for publication is permissible. The Star reserves the right to edit all letters with neighbors a gun with which to kill the

other would be unworthy of notice, so

completely does it fail to appeal to

But unfortunately, some Americans are inoculated with pacifism, or other ore dangerous poison, which incapacitates them for reasoning on such a question as the proper extent of American aid to those nations which, in a world threatened by ruthless dictators. remain in active defense of the democratic way of life.

And, unless challenged squarely, Senator Wheeler's anti-lending utterances may be accepted by numerous folk who let others do their thinking for them. I feel sure that editorial comment will acquaint the Senator with his error, but think the incident justifies expressions from private citizens, too.

Senator Wheeler recognizes the propriety of lending a neighbor a hose with which to extinguish a fire, but, blinded by prejudices to any true understanding of the world scene, omits, in opposing the lending of a gun, the important detail that the neighbor to whom it is proposed to lend it is the last major survivor of a posse that has sought to apprehend the kidnaper of several little fellows and sorely needs the gun to continue his courageous fight against the kidnaper and his gang.

Uncle Sam, by lending his good neighbor the gun, would first of all serve justice, and then, by keeping the fight off his premises, at least postpone the unpleasant task of shouldering a gun MILLER HAGEMAN.

Wants Dictator To Defeat Dictator. To the Editor of The Star:

I am so thoroughly disgusted with a small percentage of my fellow Americans I am writing this hoping that the majority of our citizens will ignore them and go ahead and do something. When a building is on fire, the fire chief becomes a dictator and in every great emergency we still require dictators. The United States needs one today. Why are we waiting? Does not every one realize that Great Britain cannot win unless we help? If Great Britain is defeated we will have war whether we want it or not, and then we will be fighting alone I will say one thing for the totalitarian

form of government, and that is that it is better in time of great emergency. So let us beat them at their own game and adopt the same kind of government until after Hitler is given life imprisonment and the word Germany no longer appears on any of the maps of the world.

This country has twice the resources of all of the totalitarian countries combined. Are we going to let them defeat all of our friends and fight them alone. or will we go in now and help those who are fighting for the same principles that we have always held so dear and have also fought for? If we cannot do it under

Haskin's Answers To Questions

By Frederic J. Haskin.

A reader can get the answer to any question of fact by writing The Evening Star Information Bureau, Frederic J. Haskin, director, Washington, D. C. Please inclose stamp for reply

Q. At what hour did the news of the Armistice reach the United States?-V. K.

A. At 2:45 a.m., November 11, 1918, the Associated Press received a flash from France that the Armistice had been signed. This was verified by the State Department at 2:50 a.m.

Q. Please give the date of the celebration in honor of Paderewski.-J. S. B. A. National Paderewski Testimonial Week will be observed from February 15-22, 1941. The testimonial will be in celebration of the fiftieth anniversary of the great musician's first visit to this country in 1891.

Q. What kind of wood is used in making skis?-R. T. E.

A. The favorite materials used in skimaking are hickory, ash, maple and birch, all of which have the qualities of toughness, flexibility and hardness in varying degrees and combinations.

Q. How early is a girl addressed as Miss?-D. J. C.

A. From the time that a girl is approximately 13, it is correct to address

Q. What queen said that Calais would be engraved on her heart?-T. J. F. A. In 1558, Calais, which had been in the possession of the English since the time of Edward III, was taken by the Duke of Guise. This loss to the English nation so distressed Queen Mary, daughter of Henry VIII and Catherine of Aragon, that she said the name of Calais would be found engraven on her heart.

Q. Why are the Japanese called Nipponese?-E. T. R.

A. Nippon is the native name for Japan and means Land of the Rising Q. What are the age limits for enlist-

A. The age limit for an original enlistment in the United States Army is 13

ing in the Army?-M. G.

Q. Please give the names of the flowers for each birth month.-M. S. L. A. January, carnation; February, primrose; March, violet; April, daisy; May, lily of the valley; June, rose; July, sweet pea; August, gladiolus; September, aster; October, dahlia; November, chrysanthemum; December, poinsettia or holly.

Q. Is it correct to say anything is most

A. Unique means the only one of its kind and cannot be qualified.

Q. What is the name of the fish that looks like a neon sign?—A. A. A. Neon Tetras are tiny fish from South America that look like miniature

in scarlet. They are only about 1 in Q. Can any one be allergic to animal?

the length of their bodies and tails tire

A. Some people are sensitive to horses, cattle, sheep, hogs, dogs, cats, rabbits, mice and poultry. Many individuals are so sensitive to chicken or duck feathers that they suffer from asthma when sleeping on a feather pillow.

Q. What determines the value of an autograph?-G. T. E.

A. According to a table of values computed by an authority, demand is first, representing 40 per cent of the element of value. Contents are next, rated at 25 per cent, while rarity is rated at 20 per cent and condition at 15 per cent.

Q. What was the fastest stock car of

A. According to the official America stock car records of the Contest Board of the American Automobile Association the fastest stock car of those tested was the 1940 model Hudson eight, which made a speed of 94.73 miles per hour over a 10-kilometer distance on September

Q. Please give the source of the line, "Death is death: but we shall die to the song on your bugles blown, England"?-

A. It is from the poem "England, My England" by William Ernest Henley.

Q. What is a kookaburra?-T. H. B. A. The kookaburra, or laughing jackass, is a member of the kingfisher family. It is a native of Australia. Because of its curious cry and strange habits it is a constant source of wonder.

Q. What caused the death of Jane Addams of Hull House?-M. B. A. Jane Addams died on May 21, 1935 after a major surgical operation for the removal of intestinal adhesions

Q. Was there a statue erected to the god Saturn in ancient Rome?-M. S. K. A. The image of Saturn was in his temple at the ascent from the Forum to the Capitol in Rome. It had woollen bands fastened around its feet all the year, except at the festival of the Saturnalia. The object probably was to detain the deity.

How to Manage Your Finances

Learn to budget your income and outgo, to shop carefully before you buy, to make a single budget and stick to it There is no easier way to increase your savings than by carefully buying everything you use, from bread to automobiles, Remember "a dollar saved is a dollar earned." The Household Budget Booklet for 1941 shows how to handle your income, be it large or small. Simple, helpful facts any one can understand, with tables, charts, budgets and ruled accounting pages. Try budgeting your income and outgo. It will help you get ahead. To secure your copy inclose 10 cents in coin, wrapped in this clipping, and mail to The Star Information Bureau.

as this life-anddeath conflict empire probable winner is better defined. we may easily wilness acts of desperation beside which the effort to

greatest metropolis is mild. One of the ghastly possibilities is the use of poison gas.

burn the heart of the world's

It is with considerable hesitation that I raise the subject of chemical warfare. The world has been praying that this horror might be averted and has avoided discussion of the

However, with the smoke rising from old churches and other monuments which have linked England with an ancient past, there would seem to be small reason not to face the possibility of the employment

Fear of Reprisals Strong.

There has been no report of the use of gas thus far in the present war. This probably has been due to

There are two schools of opinion among military men. One holds that fear of reprisals will continue to preclude the use of gas. The other believes that it will be employed if it seems to serve any useful purpose. Many experts have been watching for its use from the air against mobilization and manufacturing centers -and even against civilian populations to break moraże. Despite the fact that all major countries are its effectiveness under many condi-

among the fighting forces. The world is still awaiting the use of this frightful weapon against

At least a section of British military opinion believes that gas will be used against England, and the expressed any view publicly, but when the occasion arises. For that matter when I was in Berlin at the before war began, civilians were provided with gas masks and were ordered to keep them handy.

Britain Easier Target.

However, while civilians in all belligerent countries are supposed to carry gas masks constantly, and there are gas detectors everywhere in public places, experts have small doubt that there would be great loss of life if gas were employed against big cities. Masks get worn or damaged, and people are careless about carrying them.

The way things stand at the moment, were gas warfare to break out between Germany and Britain, the likelihood is that the latter would get the worst of the ex-change. Britain is tiny, and her big industrial population is concentrated in the central part of the country-a ready mark for gas. Also, since the Nazis are able to

work from airdromes in occupied territory, they are but a short flight from their objectives. The British, on the other hand, have a vast area to cover, and the flying distance to Germany is great.

Apart from possible attacks on civilian populations to shatter morale, gas could be used effectively against airdromes and industries to immobilize them. Even if no loss of life were caused, there might be

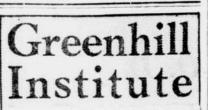

a serious holdup of operations.

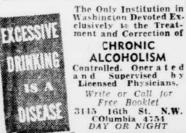

One is inclined to believe that gas will be employed only as a last resort. It may be used by a country which is on the verge of defeat and therefore desperate. Or it might be tried by a country which seemed about to achieve a victory and wanted to stupefy the enemy so as to permit of delivering the final blow.

New U.S. Consul General Leaves for Vladivostok

By the Associated Press. MOSCOW, Jan. 1.-Angus Ward, new United States Consul General at Vladivostok, left yesterday on the trans-Siberian express to establish the consulate in that Far Eastern

Germany and Japan are the only other powers with consulates in Vladivostok.

Washington Observations

Roosevelt Spoke in Terms of Force-Industrial Force—in Calling Bluff of Dictators

By FREDERIC WILLIAM WILE.

In his Sunday night broadcast-officially termed "a talk on national In his Sunday night broadcast—officially termed "a talk on national security"—President Roosevelt deliberately refrained from putting all his eggs in one basket. He decided to reserve for impending messages his eggs in one basket. He decided to reserve for impending messages to Congress and for his third inaugural address those fuller details which the country anxiously awaits regarding defense production and aid to Britain. So Mr. Roosevelt confined himself to a statement of general policy, which later disclosures and recommendations will amplify. Alhough he thus withheld key facts and figures in order to submit them first to Congress, the President had House and Senate conspicuously in The British governmen'ts charge mind when he took to the wave lengths. His transparent and primary

don Sunday with incendiary bombs back home" with a broad, frank was a deliberate attempt to destroy picture of the emergency-to arouse them to the urgent necessity of converting the country forthwith into the arsenal of democracy." The White House strategy clearly springs from the expectation that members of Congress, before returning to Washington, will have had opportunity to observe the effects of the President's broadcast upon a Nation new session in mood to give the defense and British-aid program un-

hitherto insufficiently conscious of its dangers, and will come back for the

Evidence is overwhelming that Mr. Roosevelt's presentation of the point where situation evokes almost universal approval. It dealt body blows at some recommenpopular apathy and at "appeasement." It talked turkey to both capital dations for and labor. Opposition, nevertheless, is not inconsiderable, thanks to the propaganda efforts of well-organized committees and groups, and the tain. Members antagonism of the able and determined Senate isolationists who are of Congress set for a vigorous stand against any and everything which they regard meanwhile are Jay G. Hayden. as measures leading to war, and some of whom would have us initiate a mobilizing for a concerted attack service, and at the request of Gen. "peace" movement. The President's supporters are confident his program on the act. eventually will receive all the congressional authority it may need, but are aware it faces a stern struggle on various phases. Hostility is certain to flame fiercely over any proposals which may seem directly or indirectly to infringe upon provisions of the Johnson and Neutrality Acts. Everything, of course, depends upon the precise nature of proposals to lendlease Britain implements of war or to finance her in purchasing them. While the administration projects nothing which it does not think it is fully empowered to do, its disposition appears to be to seek congressional sanction in every major direction, especially for any arrangements concerned with interned foreign shipping, further disposition or use of our warcraft on Britain's behalf and money measures

Language Which Aggressors Understand

When notifying all concerned that the United States intends to implement Britain-and Greece and China, too-to sustain themselves against aggression, President Roosevelt used the kind of language which the axis powers, notably Germany, understand best. It is the language of force-not military force, but industrial force, which America commands to a preponderant degree in the world, and for which the dictators have boundless respect. The Germans acquired that respect in the World War. After they threw up the sponge and when the time for alibis arrived, leaders like Hindenburg and Ludendorff made no bones about admitting that it was the gigantic potential strength represented by American inof motion on the ground has been dustry that spelled Germany's certain doom and made further resistance too fast to permit of its employment, hopeless. While it was always claimed that national morale was under-(2) Fear of reprisals has restrained minded to the breaking point by the hardships due to the British blockade, raying gas Army and Navy authorities conceded in confidential moments that, faced from warplanes or dropping gas- by America's unlimited productive capacity, plus our equally inexhaustible manpower, Germany would have fought on at the assured risk of ultimate,

Correct Lighting in Home Must Provide Useful, Decorative Aspects

Illumination Now Measured By Engineers in Terms of Modern 'Foot Candles'

By MARGARET NOWELL.

The proper lighting in your home is one of its greatest decorative assets as well as comforts January and February are indoor months, and whether you are curled before the study fire for an evening's reading. or hostess for a party for your friends in a brilliantly lighted drawing

Many of us drift along, putting up with the kind of lighting we were "brought up with." and pay little heed to the remarkable science of lighting which in the past few years has developed so rapidly. We spend much time in our homes after dark and we give great care to their decorative scheme, yet without a thought we leave most of them in semi-

many of us do not know about the science of "light conditioning," we live in inadequately lighted rooms.

It is important to bear two factors in mind when planning the lighting for homes. First be sure there is adequate light for seeing in comfort, and then see to it that the light is used to enhance the beauty

strain we place upon our eyes through inadequate light. The human eve is a product of at least half a-

all these years it has been called upon to function outdoors in broad daylight. Suddenly, literally over-

This meter takes the The retina of the eye is forced guesswork out of lighting problems, to contract and expand continu-

We discover that on a sunny day ously to cope with this difference in out of doors the meter measures light intensity. It is easy to see 10,000 foot candlepower, and that why a diffused light is more pleasin the interior of the average home ing and restful. This can best be today the meter measures but five obtained by using several sources foot candlepower. The difference of light; several lamps, a ceiling is so tremendous that it is little fixture and wall brackets or built-in lighting all in one room. The result is a room filled with a warm, luminous glow, the elimination of the sharp contracts which fatigue the eyes and the pointing up of all the beauty spots in the room.

Before planning the lighting of any room, consider its use. A living room is usually a double-purpose room. It is used to receive and entertain guests and also as a place for the various members of the family to read, sew or write. When planning the lighting, be sure that there is adequate light for these activities placed where it is mos natural and convenient for each one to take place. Make the lighting flexible so that it can be dim or brilliant. From the decorative angle it is important that the general illumination be soft and restful, though the depth of color in a fine painting may be brought out with subtle indirect lighting. Points of light from beautifully designed lamps, themselves a work of art, also give accent to

Two interesting new American designs give promise of a new year full of fashion importance. At left, a winter evening coat of gold kid made on trench coat lines with big pockets reflects the subtle military influence. Also significant is Hattie Carnegie's "Aunt Jemima" southern-wear silhouette with jersey bodice and gingham skirt over a crinoline petticoat. Both styles are destined to have an outstanding influence on fashions for the coming year.

Our Sincere Prayers Are For Peace

Good Will of Men Is Essential for All Progress

By ANGELO PATRI.

This is Wishing Day. I make a good wish for you and you make one for me and the great family of will on this New Year Day. What shall we wish for each other?

First, I am sure, in each heart is the wish for peace on earth and good will toward men. We want peace, we wish for it, we pray for it with all the fervor of our being We hope we may have it without using the sword to win it, but if we must, we will, and always with the wish for the peace that is based on the good will of mankind.

That good will is founded on the character of the peoples of the Morality is the spiritual force that must and will control the feeling and action of mankind Truth must be honored: consideration for the rights and feelings of others must be a matter of course throughout the world; the sacred things-religion, freedom of the individual, freedom of living in every phase of existence-must be cherished and maintained at whatever cost. Only when these essentials are preserved to all men can peace come to earth and rest there. There can be no peace when people distrust one another. Morality is basic to the confidence that begets good will.

Good will expresses itself in gracious manners. There will be no calling of harsh names, no acts of violence, no roughshod trampling of the beauty and grace of the spirits of men. Courtesy will come back to soften the words and gentle the actions of men because there will be only gentleness in their hearts toward one another.

There will be health in us when we dedicate ourselves to this peace. A spirit at peace with itself is a benediction upon the body. The friction and tension of struggle are unhealthy and bring illness, fatigue and general unfitness in their train Peace in oneself is tonic to the whole being, and there is nothing that so stimulates healthy successful action as that happy state of mind which expresses the contented mind.

This, then, is my New Year wish. Peace to you and to all mankind through you. Choose today the course that you mean to follow through this year. Settle any doubts that are in your mind and clear the way for the forward march you must make.

If you are worrying about what may happen tomorrow, let go Worry kills the body, weakens the spirit and destroys all chances of peace in yourself. If you can mend the matter do so and forget it: if you cannot mend it, never

Gift Giving at New Year's Idea Which Flourished In Medieval Times

Spectacular Offerings Were Presented to Sovereigns; Origin of 'Pin Money'

By GAEL RENFREW.

January 1 finds us nowadays with all our presents unwrapped, enthused over and adapted for use or ornament. Gift-giving, however, originally belonged to the New Year season. The Saxons inherited the custom from the Romans and as a practice it just grew and grew, reaching extravagant proportions in medieval times.

Rank and situation played a determining role in this exchange of presents. Tenants, for instance, sought favor with landlords by means of something like a fat capon, and subjects of all classes gave lavishly to the sovereign.

Sums of money received by Henry VI of England between Christmas Day, 1427, and the beginning of February, 1428, are all listed in old record books, while the manuscript rolls of the public revenue yield similar. information touching Edward VI, "Bloody Mary," Elizabeth and her

New Year was the occasion for Elizabeth to be showered with gifts on a fabulous scale. The Queen's love of finery being well known, her subjects presented her with articles of great value, and somehow it sounds like Elizabeth to read that "an exact descriptive inventory of them was made every year in a roll which was signed by the Queen herself and by the proper officer."

These gifts include sums of money, costly articles of ornament for the Queen's person or apartments, caskets studded with pre- tor of the gift certificates which cious stones, necklaces, bracelets, gowns, embroideries, mantles, smocks, petticoats, looking glasses, fans," and many more items.

Nor was it only by the great of the realm that her majesty was re-membered at this season. "Physicians, apothecaries and others of lower grade," down to the palace "dustman." contributed their quota. Elizabeth's silk-woman, a certain Mrs. Montague, presented her royal mistress at New Year 1561 with a "pair of black silk knit stockings," little thinking of what her action would mean. "Thenceforth," we are told, "the Queen never wore cloth this time stockings had been made from England, and we read that in of yarn or worsted, coarse material 1775 the stern young Congress offered order not to press on the seams. Silk stockings, however, prepared The era of spectacular giving to the sovereign seems to have ceased

D. C. Traffic Deaths Drop in Contrast With National Increase

Eighty Are Killed Here in 1940, Five Less Than in 1939; **Pedestrian Is Key to Safety**

Fifty-Eight Walkers Among Year's Victims; Campaign of Education Seen Helpful

All statistics used by The Star concerning the fatal accidents of 1940 were based on facts gathered by reporters covering coroner's inquests throughout the year to prepare the series "Why Must

By J. B. ZATMAN.

In the face of a Nation-wide increase in traffic fatalities for 1940. Washington ended the year with a score of 80 traffic deaths—a reduction of 5, or about 6 per cent, from the 85 of 1939. This gives Washington its best safety record since 1933, when 80 persons were killed.

The 1940 record was marred by a sudden spurt in fatalities during the last 10 days of December, when seven persons died as a result of traffic accidents. Six of the seven were

December was the worst month for traffic fatalities in 1940, with 13 persons killed, as compared with only seven during December of 1939. A total of 29 persons met their deaths during the final quarter of 1940-seven more than the number killed in the same period in 1939.

cation of the pedestrian still remains the most important factor in the District's traffic safety program. Fifty-eight pedestrians were included among the 80 per-

A study of the 1940 traffic toll reveals that safety edu-

sons killed in traffic during 1940. Of this number, 36, or 62 per cent, were killed while disregarding rules intended for their safety.

Violation of Safety Rules Is Shown.

Crossing a street at some place other than a crosswalk led to the death of 25 of the 36; six were crossing a street at a controlled intersection against the proper signal; three were attempting to hitch rides on moving vehicles; one jumped off a moving vehicle and one was playing in the street. In addition, two of the 25 who were crossing in the middle of the block had been drinking prior to the fatal

For comparison, 66 pedestrians were killed in 1939. Of this number, 31, or almost half, were killed crossing a street

Some measure of success apparently was achieved this year in impressing upon pedestrians 60 years of age or over the danger involved in disobeying safety rules. A total of 23 pedestrians who were 60 years old or over were traffic fatalities in 1940, as compared with 30 the year previous. Ten persons 60 years of age or over were killed in 1940 when they crossed the street at some point other than a crosswalk, as compared with 13 similar fatalities in 1939.

The great majority of last year's fatal accidents occurred in neighborhoods within 5 or 10 minutes' drive of the downtown business section. For example, four persons were killed on Connecticut avenue N.W., between N street and Nebraska avenue. Two of the four were struck while crossing Connecticut avenue at some other point than on a crosswalk, while the remaining two were crossing the thoroughfare against the proper signal.

Only three pedestrians in this age group dared death and lost in 1940 by crossing the street against a red light-

Van Duzer Cites Pedestrian Carelessness.

Directing particular attention to the problem of pedestrian carelessness, Traffic Director William A. Van Duzer deplored the tendency of many people to abandon all caution when they walk across a street.

"People just don't take proper care of themselves in traffic," he declared. "When it rains they walk around with their umbrellas down in front of their faces so that they can't possibly see whether they are in any danger. After all, no one in his proper mind will cross in front of an approaching locomotive, so why debate the right of way with an oncoming vehicle, which can kill or injure a person just as easily?"

He pointed out that an automobile traveling as slowly as 20 miles an hour requires as much as 20 or 25 feet to stop, and a pedestrian exercising the proper care can see the car coming in plenty of time to wait until it goes past.

An emphatic second of this was given by Assistant Traffic Director M. O. Eldridge, who said that "in 67 per cent of the fatal pedestrian accidents it has been found that the pedestrian himself was in a street in the path of a vehicle at such time or such location when or where he had no business to be."

Another major cause of pedestrian fatalities, he said, was intoxication. Autopsies conducted by the coroner on the bodies of seven drivers and 33 pedestrians-all victims of traffic accidents-covering a period of 22 months showed that four of the motorists had been drinking, while 15 of the pedestrians were intoxicated when struck.

That darkness increases traffic nazards tremendously is seen in the sharp jump in fatalities after 4 p.m. For example, 25 persons were killed in 1940 between 4 p.m. and 8 p.m.more than double the 10 killed between noon and 4 p.m.

These figures are almost the same in 1939, with 23 traffic fatalities reported between 4 p.m. and 8 p.m., as compared with 10 between noon and 4 p.m.

Danger in First Hour of Darkness.
Your chance of being involved in a fatal automobile accident is more than doubled in the first hour of darkness. according to the results of a Nation-wide study made recently by an insurance company. The analysis showed that there were 4,205 fatalities during the first hour of darkness, as compared with 1,663 the hour before.

Child fatalities dropped off 26 per cent from the number reported in 1939. Eleven children were killed by moving vehicles-four less than the 15 killed in 1939. But here, too, there was a tendency on the part of children to imitate their elders in disregarding elementary rules of safety. Three of the 11 were struck by cars after they ran out into the street from between or in front of parked cars. This is the same number killed in a similar way last year.

An idea of the magnitude of the traffic death problem throughout the country may be gained from an estimate by the National Safety Council that the Nation's death toll is expected to approximate at least 34,500.

This figure, which is almost 2,000 higher than the total for 1939, when 32,000 persons were killed, represents increases of from 5 to 8 per cent for every geographical region, the council reported.

Official Action in Fatalities

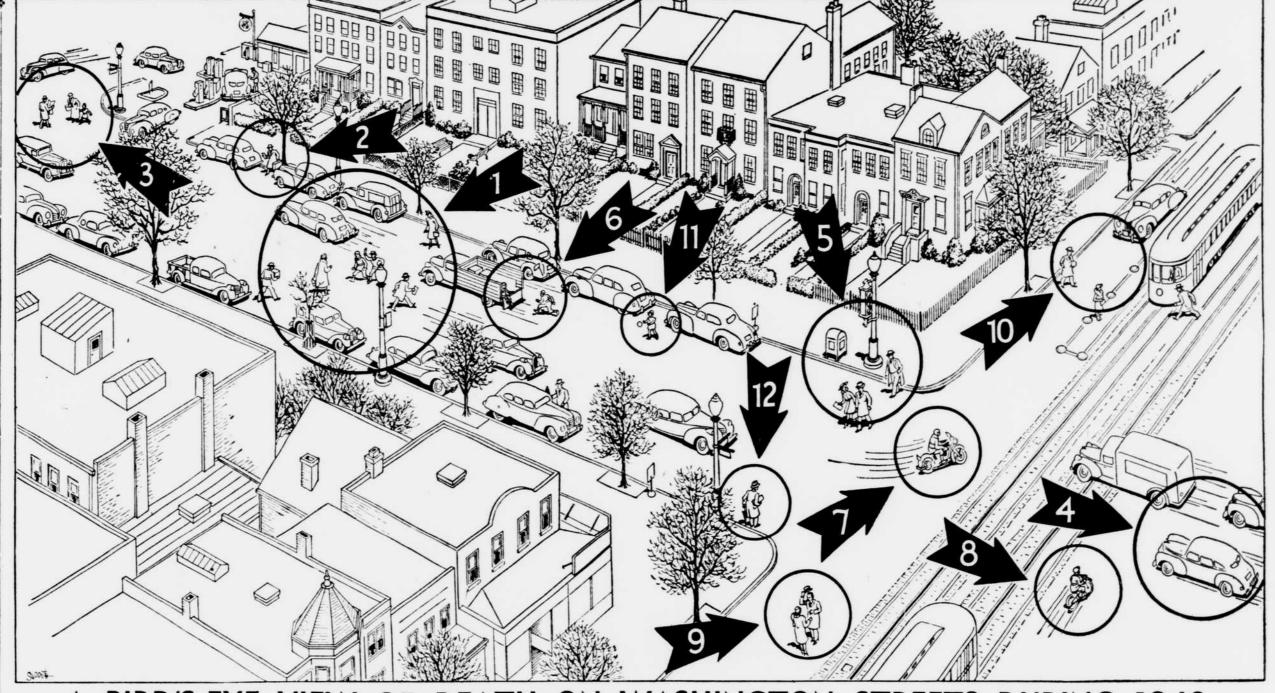

A comparative tabulation of legal action taken in 1940 and 1939 Cases in which the death car driver was absolved of blame

by a coroner's jury Cases in which no inquests were held and the coroner issued certificates of accidental death _____ Cases in which coroner's jury held driver for Police Court

action under Negligent Homicide Act (One of the 1940 negligent homicide cases was nolle prossed by the district attorney's office and the remaining 14 are still pending for Police Court action.)

Cases in which a coroner's jury held driver of death car for action by the grand jury ... (One of the 1940 grand jury traffic cases involved a hit-and-run driver, whose identity is unknown, but who will be held for grand jury action when captured by police. Four cases were ignored by the grand jury, four indictments were returned and one case is still pending. One driver, who was indicted on a charge of second-degree murder, was held responsible for two traffic deaths, but was held by a coroner's jury for grand jury action in only one. No inquest was held in the second death.)

A BIRD'S-EYE VIEW OF

This is a typical city block on the outskirts of downtown Washington. On streets like this the great majority of the 80 persons involved in fatal traffic accidents during 1940 were

A streetcar line passes one of the intersections, which is governed by a traffic light, while the other intersection is not controlled by any signal device.

In this sketch, Star Staff Artist Newman Sudduth has portrayed the acts committed by the various traffic victims which led to their deaths. The circles signify representative groups of individuals killed committing the act illustrated. The num-

bers in the arrows refer to the specific act, as given in the following key:

1. The most hazardous traffic action during 1940-crossing a street at some point other than a crosswalk. This action

2. Stepping from between parked cars. This act was a contributing cause in seven of the 25 deaths mentioned above.

3. Crossing a street at an uncontrolled intersection. Twelve

4. Driving a motor vehicle. Eight killed. 5. Crossing a street at a controlled intersection against the proper signal. Six killed.

DEATH ON WASHINGTON STREETS DURING 1940

6. Hitching rides or trying to jump off moving vehicles. Four killed.

7. Operating a motorcycle. Two killed.

8. Riding a bicycle. Two killed.

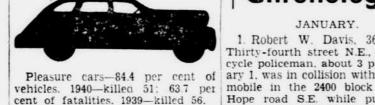

9. Standing in the middle of a street. One killed.

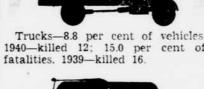

10. Standing in a safety zone. One killed. 11. Playing in the street. One killed.

12. Standing in a gutter. One killed.

Nine of the 80 District traffic deaths of 1940 are not illustrated. Seven of these are still being investigated to determine the causes of the accidents. One person was killed walking beside a road and another was run down attempting to stop stampeding horses.

his eyes tested a draft board physi- years' driving experience. No inwas related today at national head- tificate of accidental death.

The lad couldn't make out the fumbled assortment of large and small letters on the chart simply because he couldn't read and write. But the selectee had an idea. "Get me a squirrel gun," he suggested, "and I'll show you my eyes are O. K. They got him a rifle.

When he punctured a knothole doctor decided the boy's eyesight was worth gambling on.

A Georgia draft official suggested to selective service headquarters that the plan might be worth trying when other illiterate selectees were called up, though it was realized a man might have sound eves and still be a poor shot. Moreover, physical standards for selective service prescribe special illiterate test cards containing figures which can be described by persons unable to identify the alphabet. But the just the same.

Georgetown Plays Before 34,000 as Third of Million Fans See Six Bowl Tilts

Win, Lose or Draw Pasadena Leads

Orange Bowl Prelude

MIAMI, Jan. 1.—This is the way a football team goes into battle: Premptly at 8:15 o'clock, while the rest of the world was snoozing off the New Year eve or staggering home from it, telephones rang in 17 rooms of a hotel on Miami Beach, two at a time, Georgetown's warriors

They didn't look much like warriors. In their baggy trousers and open-at-the-collar shirts they were just a gang of boys. A bit on the big side, perhaps, but just a gang of college fellows. They could have passed for draftees as they piled into the bus in front of the hotel . . . piled into the wagon until the springs creaked protestingly.

At mass at 9 o'clock there were only 32 of the squad in the pews. The other two were Quarterback Joe McFadden and Left Guard Mark beaten, was an 8-5 choice in the Ostinato. They were helping the Father Law serve mass as altar boys. Orange Bowl over Georgetown's big There were plenty of altar boys on the Georgetown team, including Hoyas, whose only loss in more than Helfback Jules Koshlap, End Bill Wixted and Quarterback Lou Falcone, than two seasons was a 19-18 scrambut McFadden was a regular and Ostinato was right behind him. Mc- ble to Boston College. Fadden, the back whose victous blocking has stamped him as one of The weather at Miami, Fla., was Georgetown's great backs of all times, serves every day, 365 days a year. humid and cloudy, but all the 34,000

The Hoyas Were Called "Up"

Everything ran on schedule. To the minute, they obeyed the itinerary. Two stellar arrays of all-stars were At 9:45, for instance, they were sitting for breakfast in a private little matched at the Shrine's annual dining room. The breakfast consisted of a thick steak and baked po- East-West charity game at San tatoes. Two hours later they were back in the bus-bound for the Orange Francisco, with the Westerners fa-Bowl to keep a date with Mississippi State.

The team was "up." This is the term used to describe a football outfit which is mentally ready for a test. The Chicago Bears were called "up" by all of the newspapermen and observers who came to Washington with them for the playoff game with the Redskins. It isn't hard to rec- broadcast by Mutual, ognize the signs. The players don't laugh and joke much as the game nears. They don't snarl, either. They usually are quiet and grim and senting the border conference for

The bus pulled up to the Orange Bowl Stadium at 12:30. This was none too scon. In seven years the Miami people have made remarkable Reserve furnishing the opposition. strides. They have a pageant that lasts almost an hour before the game and which ranks today as the equal of any of the Rose or Sugar Bowl overnight showers. Kickoff was set

Down in the dressing room under the concrete stadium, the Hoyas tional broadcast. could hear the bands. There were 70 of them, embracing 3.100 musicians.

Bands and Yells Through a Concrete Wall

Beneath the stands the 16 graduating seniors, playing their final spectators. The weather was fair, college game, shook hands and then gripped the nervous, sweaty paws of other teammates-the juniors like Al Blozis and the sophomores like Jack Doolan. Today's was a game that might well be won or lost by other

The three coaches, Jack Hagerty, George Murtagh and Mush Dubofsky, talked and watched over their charges like mother hens. Their work was almost finished. All that remained for them to do was to substitute at the proper times. They had equipped the team with the best plays they knew. They had called meetings and had talked at length with the four quarterbacks, McFadden, Falcone, O'Connell and

Harry Crowley was the busiest man in the room. Harry Crowley is the old trainer, practically an institution at Georgetown. He is a winkled fuss-budget with short-clipped gray hair and, like most veteran trainers, he ruled with a stern hand as he squeezed flesh and bones with

Fathers Kehoe and Law hovered in the background, watching silently. They were excited, too, but they did not show it outwardly. They, too, heard the bands through the thick concrete walls and they recognized the strains of the blue-and-gray uniformed band which blared "Sons of the strains of the blue-and-gray uniformed band which blared "Sons of Georgetown." and they heard also the "Hoya, Hoya, Saxa" chant of 1,200 Princeton Dean Urges Tennessee Choice Over Rugged Ags and Fordham Due

To Keep a Date With Destiny

The players got dressed and went onto the field in their white uniforms to warm up and to kick and pass the ball. The general idea was to get acclimated to the huge stands and to the field. The players always like the warm-up period. They kick, pass, run and roll to loosen up their muscles, but, most of all, to be active and to shake off the tenseness. For almost a week the Hoyas read of the Orange Bowl festival, they had no way of first-handedly knowing the magnitude, because they were confined to strict training in a hotel so quiet that no bar was operating a few moments after the New Year was hailed with a violent hush. But they read of the Sun Girl and of the John Powers models who participoted in the build-up and of the New Year eve pageant which lasted ng and set a new high for lavishness.

After the practice session they came back to the dressing room and course of all the athletic conventions suddenly, like a blanket of fog. it hit the Hoyas again. The Boston Col- held here the last several days, the lege game was a practice session compared to this affair. Sitting in the brass hats of the amateur athletic stands were upward of 1,200 undergraduates and alumni who had traveled a minimum of 1.200 miles, via air, auto and train, to see Georgetown's greatest team in the hilltop's greatest moment of glory.

Then it happened. A stadium flunkey stuck his head in the dressing room door and yelled "five minutes." That was the signal. With a whoop the Hoyas trooped through the narrow doorway to keep a date Athletic Association a thing or two each of which completed its regular with destiny, as the newspapers lightly put it, and as the Hoyas heavily

East's Coaches Fear Charges Are Not in Trim to Beat West in Shrine Battle

Associated Press Sports Writer

SAN FRANCISCO, Jan. 1.—Quirks Probable line-ups (kickoff at 2 that make football players heroes p.m.) one Saturday and hams the next turned the Shrine East-West classic into an unpredictable tossup today, with the Westerners in a fine spot to knock a skyfull of stars out of the favored Easterners' crowns.

The talent-littered squad from R.H. east of the Mississippi lined up like a coaches' dream, but Andy Kerr and Bernie Bierman, aware of several disturbing, factors, were not too sure their team would be at its peak against the Westterners in Kezar Stadium today before a New Year sellout crowd of 62,000.

Wisconsin. 52: Princeton, 40.
Northwestern, 46: Notre Dame, 36.
Illinois 40: Marquette, 32.
Towa State 45: Drake, 26.
Georgia Tech, 44: South Carolina, 35. not too sure their team would be New Year sellout crowd of 62,000.

Besides rains curtailing practice and several players, including Tommy Harmon of Micheigan, training in what sports observers regarded as a lackadaisical fashion, a lastminute distraction popped up when was recruited for a British war relief game to be played in Los An-

geles on January 5. While most of the Western squad has been signed up for this Los Angeles affair, there has been no evidence that they haven't been training in dead earnest, determined to upset the Easterners with a fine passing attack keyed by Paul Christman of Missouri and Jimmy John-

son of Santa Clara. With superlative running power in Harmon, Francis X. Regan of Pennsylvania and several other classy backs and a crack passer in Dace Allerdice of Princeton, the Easterners were initial favorites at

odds of $2\frac{1}{2}$ to 1. But with the way Coaches Matty Bell and Babe Hollingberry have been pointing the Westerners for this game the odds have steadily dropped to 10 to 8 and neared even money as game time approached. Both squads were free of injuries and, except for two or three hangovers from colds in good condition. A dry, fast field was in prospect | took the ball and handed it to a

afternoon.

Gauss Declares Coaches Should Be on Faculty To End Talent Hiring

By GAYLE TALBOT,

NEW YORK, Jan. 1.-If nothing else of importance happened in the industry received an unexpected kick in the teeth from Dean Christian Gauss of Princeton University.

The dean, a mild-looking pedagogue with a sore throat, told the officials of the National Collegiate with two big fast, versatile elevens at yesterday's luncheon. He didn't schedule without defeat or tie, seekgive them an advance copy of his ing to maintain their records. Coach remarks, for reasons that became obvious almost as soon as he reared up at the speaker's table and began possibility of alibi out the window in punctuating his words by pounding pronouncing their respective squads nis fork on the linen.

He began by startling them out of their noon-time reverie with the the capacity crowd was, trickling associations be abolished in all Year celebration started hours beschools, nudged them into acute fore along boisterous Canal street. country was employing outright pro- hour every seat was expected to be fessionals, and before he got through filled. he had a roomful of men looking very uncomfortable.

thunder-clap. He said, listen fellows. we're not fooling anybody. We're still hiring halfbacks who move their lips when they read words of more than two syllables. We won't be genuine amateurs until we quit doing this, and until we make our coaches members of the faculty

The dean didn't use these words because he is extremely well educated and because he could not be that crude, if he wished. But that was what he meant. He was the

ALSO-BOWLING Table Tennis and Archery PHONE - EM. 8100

It Appears as Though 'Old Yankees' Are Dead By JOHN LARDNER. NEW YORK, Jan. 1 (N.A.N.A.) .-Edward G. Barrow, the cold, tough operator who runs the New York

The "old Yankees" were the high Chess Association, she is keep- straight World Series victories, and ing a card index of all District school | were considered by some critics and Israel Horowitz, who has repre- players and would have all of them many fans to be the best baseball

Of the line-up which picked up the dice in 1936 and started this of the American Chess Federation, When the team championship long, hot run of passes, only two for next season. You have Mr. E. G. Barrow's word for that

Di Mag Alone May Be Left; Ruffing an Uncertainty

The bell has tolled for all of them but Joe Di Maggio and Chatlie Ruffing, and Ruffing, who was armweary and pitching with his head last season, is by no means a certainty. That leaves Di Maggio-the ong and hawk-billed center fielder from San Francisco, who broke in as a freshman in 1936 and became the keystone of Yankee supremacy. Now, not quite five years later, they are building a new team around the

same fellow. Mr. Barrow does not say all these things flatly and baldly, but he casts a hint here and ventures a tatement there, and the upshot of what he has to say is as follows: Phil Rizzuto, the widely advertised young Kansas City shortstop, is practically being invited with a lace

card to take over the job for the Yankees next summer The other Kansas City musketeer Jerry Priddy, second baseman, is more than likely to step in alongside Rizzuto, sending Joe Gordon

over to third base. These two moves would mean the benching or trading of Frankie

Crosetti and Red Rolfe. Holmes May Be Answer To Outfielder Need

The Yanks are hell bent on finding games a new outfielder (possibly Tommy than Holmes, from their own farm sys-

> Lefty Gomez and Bump Hadley are no longer counted on. Perhaps half ously considered for jobs with the

Monte Pearson has been sold,

when the "old Yanks" began to roll:

Crosetti, shortstop. Rolfe, third base. Di Maggio, center field. Gehrig, first base. Dickey, catcher. Selkirk, right field. Powell, left field. Lazzeri, second base The big four of the pitching staff

were Ruffing, Gomez, Pearson and Hadley. Fireman John Murphy led the relief corps.

It is quite possible that the Yankee line-up for any given key game in 1941 may read as follows:

Rizzuto, shortstop. Priddy, second base. Keller, right field. Di Maggio, center field. Rosar, catcher. Holmes, left field.

Gordon, third base,

Dahlgren or Sturm, first base. Your pitcher-and this is a key game-might be Ernie Bonham, or Marius Russo, or Marvin Breuer, or Steve Sundra, none of whom was with the club in 1936. And if relief is needed, it may well be some younger man than Fireman John Murphy who trudges out of the bullpen, for the fireman is now for

Dr. West to Mark 30 Years of Service as **Chief Scout Executive**

Honor to Be Tendered At National Council Meeting Here in May

Thirty years' service as chief scout executive of the Boy Scouts of America will be celebrated tomorrow by a former Washingtonian who. placed in a local orphan asylum at an early age, worked his way to national head of the Nation's largest organization of youth.

He is Dr. James E. West of New York City, who became chief scout executive January 2, 1911, and has served in that capacity ever since.

While no official observances of his anniversary will be held here at this time, Dr. West will be honored locally in May scout headquarters has announced. The date marks the annual meeting of the National Council which will attract scout leaders from all parts of the United States and its territories

Crippled in Childhood. Stricken while in the orphanage with a disease that left him a cripple, Dr. West overcame poverty and the loss of parents to become acting general secretary of the local Y. M.

He received a law degree here and was admitted to the District bar. Attracting the attention of President Theodore Roosevelt, Dr.

DR. JAMES E. WEST.

West was appointed a member of the Board of Pension Appeals, and later an assistant attorney in the Interior Department.

Dr. West was a pioneer in child welfare work here and later nationally. He organized a citizens' committee which was responsible for the creation of the local Juvenile Court He was active in promoting the Washington Playground Associa-

As secretary of the National Child Rescue League he directed the placement of 2,000 homeless children in childless homes.

Edits Scout Magazine.

He was asked to become secretary of the scout movement in its infancy, and has been largely responsible for the development of the scout program since that time. He is also editor of Boys' Life, a scouting magazine, and has edited the scout handbook.

The National Institute of Social Sciences in May, 1940, awarded Dr. West its gold medal for "distinguish-

ed service to humanity. A jamboree camp chief, Dr. West took a leading part in the planning and promotion of the National Scout Jamboree which brough together more than 27,000 scouts and their leaders to Washington during the summer of 1937 for 10 days of camp-

Portable Power Plant Can Serve City of 10,000

By HOWARD W. BLAKESLEE. SCHENECTADY, N. Y. (A).-An electric power substation on wheels that can travel 50 miles an hour and feed out enough electricity for a city of 10,000 is ready for 1941's storm damage to electric lines.

The plant is built on a trailer and is no larger than a mediumsize truck. It offers a new step in quick restoration of electricity when power lines go out and for bombed communities in war it has special possibilities.

The General Electric Co. designed the portable power plant. It has a retractable, trolleylike tower rising from the roof to make the connection with a power line. Inside are transformers and switching systems to distribute the electricity. Two types have been made, one for large communities and the other for small.

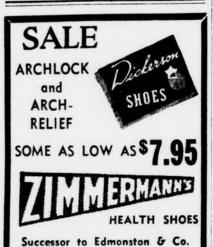

To make sure that children or prowlers do not burn themselves the parts which might be touched by outsiders are set behind a heavy steel screen. The rest of the plant is sheathed like an armored truck behind steel plates.

Cowboy's Horse Blamed In Mystery Drowning

By the Associated Press.

WATSONVILLE, Calif .- Deputy Lowell Rountree found a dead duck floating on Kelly Lake. On the bank stood a saddled horse, beside him a

shotgun. The body of Cowboy Fred Dorrance was found in the lake. Rountree, reconstructing the drowning, reported Dorrance shot the duck and walked his horse into the lake to retrieve it. The horse threw him into 8 feet of water and returned

Nine Governors Have Accepted **Inaugural Bids**

Five Republicans Listed; Presidential Stand to Be Started

Nine Governors, five of them Republicans, already have notified officials here that they will be on hand to participate in the third-term inauguration of President Roosevelt. Many more State heads are ex-

pected in person and those unable to be here will send representatives. The governors and their aides will ride in automobiles in the inaugural parade following the oathtaking ceremony at the Capitol. They will be placed directly behind the parade marshal, Gen. George C. Marshall, Army Chief of Staff. At the end of the parade route, they will take up places in the presidential reviewing stand to watch the rest of the two-hour procession.

hTe Republican Governors who have replied affirmatively to Inaugural Committee invitations are Dwight H. Green of Illinois, Sumner Sewall of Maine, Robert O. Blood of New Hampshire, William H. Wills of Vermont and Leverett Saltonstall of Massachusetts.

Democratic Governors accepting so far are Frank M. Dixon of Alabama, Keen Johnson of Kentucky, Paul B. Johnson of Mississippi and Burnet R. Maybank of South Carolina.

Meanwhile, construction of the presidential reviewing stand is expected to be started within a few days. Contract for this work has been awarded to Skinker & Garrett of this city. Engineer Commissioner David McCoach announced last

The reviewing stand, in which the President himself took a hand at the design, will be of American Colonial motif and will be in front of the White House.

Nearby will be posted a guard of honor, including representatives of war veterans' organizations and

Boy's Picture With Bread Crust Naval Reserves Sail To Go to Marine Corps Wins Four Quarts of Milk Daily Today for Service In Caribbean Waters

The Star, during its campaign for funds to spread Christmas cheer to the needy, published the picture of a child breaking a crust of homemade bread.

The child's sweater was patched. The table at which he sat showed the marks of time and wear. His face was turned away, but you could see his fingers holding the rough bread.

Because of that picture, seven children, deserted by their father, barely kept alive by their mother, will find four quarts of milk on the front porch of their shack

every day for the next year. The picture came to the attention of an anonymous contributor. He wanted to order a quart of milk daily for that boy. He talked the matter over with Edgar Brawner, president of

Chestnut Farms Dairy. He had been told the family lived almost at the city limits. Could milk be delivered to the shack? Mr. Brawner said it could. He went further. He the family-three more quarts of milk because the welfare agency taking care of the family told him that much was needed to give the seven children the milk

they should have. The contributor who had responded to the appeal of a small boy with a crust of bread reported

to The Star: "I know that 1941 will be a happy year for all of us because we were able to help this family.'

Former Capital Woman

Miss Joan Dodd Becomes First Debutante of 1941 At a Tea This Afternoon

Mr. and Mrs. Jouett Shouse Introducing Her in Party at O Street Home; Merrills Entertain Tonight

By MONA DUGAS.

All the merriment and gayety available in the Capital and its environs escorted the New Year in last evening, and parties celebrating the passing of 1940 are continuing through today.

First debutante of 1941 is lovely Miss Joan Dodd, whose mother, Mrs. Jouett Shouse, and Mr. Shouse are introducing her to society at a tea from 4:30 until 7 o'clock today. The party is being held at their home, at 3300 O street, which is the old Thomas E. Waggaman mansion.

The New Year debutante created an innovation among the buds of the season by rejecting the usual gown of white and is making her bow in a black Chantilly lace dress over flesh-color marquisette. The frock has a square neckline, long sleeves and a full skirt, and with this she is carrying an envelope muff of flesh-color carnations bordered with a band of black chiffon. Her mother is wearing a silver and black lame gown, and her corsage, of Amazon orchids, is of one of the latest types orchid developed. They are like small white lilies, with green in the tube of the blossom.

Mrs. Willkie Plans to Arrive In Time to Assist Hostess.

Mrs. Wendell L. Willkie planned to arrive in time to assist Mrs. Shouse at the party, but delayed airplanes made her arrival problematical. Other assistants include Mrs. Robert H. Jackson, Mrs. Burton K. Wheeler, Representative Edith Nourse Rogers, Mrs. Howard Bruce of Baltimore, Mrs. Arthur H. Vandenberg, Mrs. Nicholas Longworth, Mrs. Warren R. Austin, Mrs. Lincoln Filene of Boston, mother of Mr. Shouse; Mrs. Robert Low Bacon, Mrs. Keith Merrill, Mrs. George Angus Garrett, Mrs. Prochnik, Mrs. Arthur Woods, Mrs. Randall H. Hagner, Mrs. Wallach Merriam, Mrs. Charles Adams Baker, Mrs. John. Caswell, Mrs. William P. Mac-

AFTER CHRISTMAS

Three Feted By Junior League

Group's Work Is Described at Luncheon

Miss Gloria Chandler of Chicago, field representative of the Junior Miss Lucile Jenkins were honor guests of the Junior League of Washington at an informal luncheon yesterday at the league clubrooms.

The guests were in Washington for the conference of the American Educational Theater Association which met here Monday and yes-After the luncheon Miss Chandler

spoke informally on the work of the Junior League in providing good entertainment for children through the medium of radio, theater and marionette plays.

The work of the Washington

Junior League was represented in the theater arts exhibition set up for the conference. This included puppets from the marionette play, 'Hansel and Gretel," which has been produced by the local league before several thousand Washington school children, and costume sketches by Mrs. Robert W. Parker for "Rumplestiltskin," now in production. Mrs. Thomas A. Knowles, chair-

man of the Arts Committee, and Mrs. Detlow Marthinson, chairman of the Marionette Committee, who arranged the Washington league exhibit, were hostesses at luncheon About 20 members of the Junior League attended, among them Mrs. Andrew Cruse, Miss Julie Camp, Miss Jane Culbertson, Miss Barbara Bolling, Mrs. John Ward Cutler, Mrs. John O. Henderson, Mrs. Arthur H. Hudson, Mrs. A. A. Hoehling, Miss Juliet Dulaney, Mrs. F. Vernon Foster, Mrs. Francis Almirall, Miss Elizabeth Houghton, Mrs. W. Thacher Winslow, Mrs. Robert W. Wilson, Mrs. Eugene Sloan, Mrs. Robert Watson and Miss Elizabeth Sladen. Mrs. David B. Karrick and Mrs. B. Lowndes Jackson were in charge of arrangements.

Congressional Club Begins Its Season With Open House

The Congressional Club will have its first formal function of the season this afternoon with the annual open house. Several informal parties for the young people in the families of members have been held during the holidays, but the formal opening of the attractive clubhouse at 2001 New Hampshire avenue is traditionally the New Year Day re-

Speech Experts Told **Emotional Upsets Ruin Remedies**

Stuttering and Other Troubles Come Back, Dr. Hahn Says

Their subject's divorce or loss of a sweetheart may operate to ruin the work of speech correctionists, Dr. Eugene Hahn of Wayne University told a sectional meeting today at the 25th annual convention of the National Association of Teachers of Speech in the Mayflower Hotel.

Dr. Hahn pointed out that remedial treatments often are rendered useless by emotional disturbances experienced after their completion by persons having speech defects. Speaking on "The Effect of Remedial Treatment on the Frequency of Stuttering on Oral Reading." Dr. Hahn said many of his subjects had acquired unimpeded speech "for all practical purposes," but he would not guarantee that the gains would be preserved in the face of any of a

Roberts Praises Blaine.

Speaking in a section on Amer-ican oratory, Prof. H. G. Roberts of George Washington University said he would not quarrel with Dr. K. G. Hance of the University of Michigan for having left Prof. Roberts' subject, James G. Blaine, out of a list of the 15 greatest American orators. The George Washington University instructor explained that Blaine's speeches were restricted to political matters of little interest today. This, he said, made it understandable that the orator, regarded as one of the greatest of his day, now is rememered for but one speech, a eulogy of President Garfield.

Argentina Grain Exports Drop Heavily in 1940

By the Associated Press.

BUENOS AIRES, Jan. 1.-Warclosed markets caused a drop of more than 5,000,000 tons in Argentina's vital grain exports during Dr. John R. Steelman, director of College, I. M. Cochran, Carleton 1940, the government announced

Against a yearly average of 12,-114,000 tons of grain exported in the 10-year period from 1930 through 1939, Argentina shipped out only 7,050,000 tons in 1940.

The greatest decrease was in corn. less essential than wheat to warring nations. The 1940 exports of this grain totaled only 1.843.000 tons, compared with a yearly average of 6.252,000 tons in the previous 10 years.

Charity Case by Marie Bowers

The story thus far: Dr. Gale Barclay refuses to explain away the circumstances that have made his bride, Viola, suspicious of his patient, young Mrs. Smith. The young woman's husband is missing, and Gale, because of her condition, sends her weekly sums of money. Vi, however, before learning of this had wanted to inquire into Mrs. Smith's background and Gale had vehemently warned her to mind her own business. Shortly after Vi gets a job in a dress shop anonymous sums of money reach Mrs. Smith and she supposes they are from her husband. For Christmas Gale gives Vi \$75 for an evening gown to wear at a party for the engaged couple, Brenda Carlisle and Doug Clayton. The dress she gets doesn't impress Gale as being especially attractive.

CHAPTER X.

The party for Brenda Carlisle and Doug Clayton was put on by the members of their bridal party. The wedding was only a few days away, and every one there was in high spirits. The bridesmaids chattered constantly and hung together in a more or less aloof little group, with the ushers in another little clique always near by

Brenda looked, and how

Brenda was beautiful in a creamy satin gown, her hair in sparkling golden order and her skin like. smooth, warm ivory. Dr. Barclay thought as he looked at her that he must certainly have guessed badly about her folks' finances. The salary she made as a stenographer never bought that dress; neither had it bought the silver fox cape she had been wearing when she entered. Gale had been to this club several times and he knew where there was a usually quiet and secluded smoking room. As he went with Vi toward the long table set for the party in the dining room he made a mental note to drop into that smoking room later for a nap. He'd had a hard and long day and party- lovely ing was a distinct bore at the

"Gale!" The word was so tight and hard it was almost like it had been said in fear. "You don't really think that, do you?

Vi Refuses Explanation.

"What else can I think?" Gale demanded. "I gave you money to get a nice dress and you spent a fraction of it for a cheap one. What am I supposed to make of it? That you suddenly got economical? That you decided to save us a lot of money? Do you think I'm crazy?"

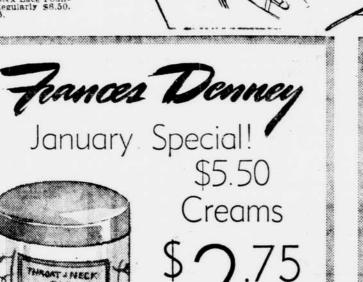

Vi bit her lip, sitting there on the edge of the bed, and her shoulders drooped. After a moment she got up slowly and pulled down the covers and climbed in. And after she was settled, with her face turned toward the wall away from Gale, she said: "One time I asked you to explain something to me, Gale, and you refused. Isn't it fair for me to refuse once, too?"

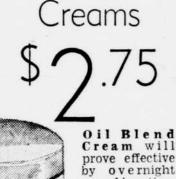

Gale didn't answer for a moment, but then he realized she was talking about Mrs. Smith. For some reason, when that thought occurred to him, he was angrier than before. "Sure," he said, not trusting himself to say more. "Sure, that's fair enough." And then he got into his bed and

turned out the light. There weren't a dozen words exchanged between them during the days that followed until Doug and Brenda's wedding. They hadn't gone out on New Year eve. On the morning of New Year Day, Vi, at breakfast, had said, "Happy New Year, Gale."

And Gale had looked up from his newspaper long enough to smile absently and say, "Same to you, Vi." Gale Warns Vi.

That was all and the strain was telling on them both. Gale's hours at the office got longer all the time

Expansion Achieved, Plane Industry Is Set **Big-Scale Production**

Plant Space and Output Both Doubled in Year, Survey Declares

By JOSEPH S. EDGERTON

Following a year devoted primarily to plant expansion and tooling up the United States aircraft manufacturing industry is going into 1941 with decks cleared for its biggest assignment in history-the production of warplanes to defend the Nation, the hemisphere and the democratic way of life throughout the world.

A year-end statistical roundup by the Aeronautical Chamber of Commerce, the trade body of the air-craft industry, shows that the tremendous plant expansion program which is the necessary prelude to any large-scale aircraft production, is well in hand at the beginning of the new year.

While accomplishing this expansion, the industry has, at the same time, more than doubled during 1940 its production of planes, engines, propellers and accessories, it was

Expansion Accomplished

"Expansion was the aeronautical industry's job in 1940—that and the hiring and training of men to build the airplanes needed by the United States and Great Britain," the Aeronautical Chamber's new Aviation News Committee reported in summarizing results of the survey. "How well the industry has handled; its 1940 assignment may be judged by the following statistic

"At the start of 1940 the industry had 11.983,896 square feet of working space. At the end of 1940 this total had been expanded to more than 22,500,000 square feet.

"On January 1, 1940, there were 60.000 productive workers employed. On January 1, 1941, that figure has risen to better than 165,000.

"In other words, the aeronautical industry doubled its productive working space, spending more than \$83,000.000, and providing employment for thousands of construction workers. It practically tripled its employment rolls

"And while it was doing this, the industry was still able to make spectacular gains in production. The dollar value of airplanes delivered in 1940 was more than two and onehalf times that of 1939."

What Seven Firms Did.

that between January 1, 1940, and today the seven leading airplane manufacturers in the Eastern United States accomplished the following in the way of plant and per-

Bell Aircraft Corp., Buffalo, N. Y., Increased floor space from 210,000 to 435,000 square feet; personnel from 1.160 to 4.300.

Aeronautical Corp., Long Island City, N. Y., increased floor space from 170,000 to 850,000 square feet; personnel from 960 to

Wright Corp. Buffalo, including the St. Louis division, increased floor space from 799,000 to 949.000 square feet; personnel from 4.981 to 11.600.

Fairchild Aviation Corp., New York and Hagerstown, Md., increased floor space from 84,000 to 105,000 square feet; personnel from 485 to 1.210.

Glenn L. Martin Co., Baltimore, increased floor space from 1.103.070 to 1,663,000 square feet; personnel from 13.000 to 17.500.

Republic Aviation Corp., Farmingdale, N. Y. (the former Seversky Aircraft Corp.), increased floor space from 200,000 to 230,000 square feet: personnel from 1.350 to 2.650.

Vought-Sikorsky Aircraft Division of United Aircraft Corp., Stratford. Conn., increased floor space from 300,000 to 370,000 square feet; personnel from 1.600 to 4.500.

Eastern aircraft factories, with the exception of Glen L. Martin Co., are engaged primarily in the production of pursuit and interceptor aircraft. Martin is producing twoengined bombers and large Navy patrol-bombardment flying boats. Fairchild is engaged chiefly in the production of military training planes. Bell, Brewster, Curtiss, Republic and Vought-Sikorsky are building the vitally important highspeed, high-performance pursuit, interceptor and fighter aircraft which are the most effective protection against hostile bombers and which are essential as protection to permit friendly bombardment at-

tacks to be driven home. Eight Western Firms.

The eight principal Western airplane manufacturers accomplished the following results

Boeing Airplane Co., Seattle (including the Stearman Division at Wichita, Kans.), increased floor space from 921,000 to 1.636,000 square feet; personnel from 6.500 to 10,000. Consolidated Aircraft Corp., San Diego, increased floor space from 961 500 to 1,700,000 square feet; per-

sonnel from 3.200 to 14.000. Douglas Aircraft Co., Santa Monica, Calif., increased floor space from 1.600.000 to 1.875,000 square feet; personnel from 14,100 to 19,-

Lockheed Aircraft Corp., Burbank, Calif., increased floor space from 668,000 to 1.139,205 square feet; personnel from 7.400 to 17.400. North American Aviation, Inc.,

Inglewood, Calif., increased floor space from 600,000 to 1.012,680 square feet: personnel from 4.800 to 8.500. Northrop Aircraft, Inc., Hawthorne, Calif., increased floor space from 13,000 to 516,000 square feet; personnel from 73 to 2.600.

Ryan Aeronautical Co., San Diego. increased floor space from 80.000 to 160,000 square feet; personnel from 600 to 1,500.

Vultee Aircraft. Inc., Downey, Calif., increased floor space from 281,000 to 720,000 square feet; per-

sonnel from 848 to 5,400. Produce Bombers.

These Western factories produce all of the heavy bombardment planes for the Army and Great Britain manufactured in this country and many of the medium bombers. Many trainers and fighter or pursuit airplanes also are produced in the West. Consolidated is an important producer of naval aircraft of the long-range four-engined type.

Boeing and Consolidated both produce long - range four - engined bombers for the Army. Both models recently have been made available for export to England and 20 Boeing "Flying Fortress" bombers and 26 Consolidated four-engined ships already have been definitely allocated to England. Boeing also is completing six giant ocean-clipper flying boats for Pan-American Air-

What City Is Like,

Business Fort de France, its shops, bazaars, hotels and multitude of bars and wine shops, sets on the small flat directly before you, a crazy, packed collection of centuryold buildings of corrugated iron and To Be Offered Again

Residential Fort de France is nitched into the mountain range Iowa said today he, Senator Bulow, that rises abruptly just beyond this Democrat, of South Dakota and downtown section. Other homes are set into the torraced bluffs on the of Michigan would reintroduce in north side of the harbor.

The formality of a call at the American Consulate over, we set out for a further view of this scene on which our strategists are casting such covetous eyes. The place is under military rule, with Admiral Georges Robert in supreme command. He is commander in chief of all the French in the Western Hemisphere. The Island General Council was suppressed October 27. When Vichy announced the powers conferred upon Admiral Robert many American newspapers renewed their editorial concern over the possibility of a new Berlin-to-Vichyto-Martinique play here at this vital gap in our defense picture. Apparently this bothered the admiral

Radio Censorship. Listening to non-French language broadcasts in public places is forhidden. Theoretically this is cutting out all of the English broadcasts as well as our own good-will programs beamed at Latin America. Actually it does nothing of the From private homes, back apartments you hear of programs, and no one does any-

One of the first calls was on the officer of information, Capt. L. V. Bayle. - Wesexpect to encounter a a voungster who might easily be mistaken for a serious American college senior. His English is ex-cellent. This first call was soon after the Gen. De Gaulle headquarters in America announced that when they controlled Martinique the United States could have that highly desirable Navy base there. The captain was asked to comment.

"That is very liberal of De Gaulle." he remarked. "You know in France we have a story about a fellow who sold a bear skin. He did not mention the fact the skin was still on the bear, and the bear was still up in the mountains

Sympathy Died at Dakar. answers to one of the questions we came here to ask, the official reaction to the De Gaulle movement. The opinion of Capt. Bayle is general in all official circles. De Gaulle. with the British, and the British are hated only slightly less than the Italians. They will tell you that whatever sympathy his move may have commanded died at Dakar.

De Gaulle's followers probably will answer this one with: "Sure, and look who's talking. Officials appointed from Vichy, and who's the real boss in Vichy?

There has been a decided tightening of discipline among these military officials in the last few weeks. One well-informed Frenchman told us that a month ago he would have said that an American landing would have been met by opposition only enough to save the face at Vichy. Today he will not say that. He believes these officials would direct a pretty good fight.

This may be just one man's opinion, but if he is right this fight could be costly. In this mountainous terrrain and along the twisting, narrow roads a few carefully selected machine gunners could do a lot of damage long after forts and other central points were si-

Soldiers Busy. Col. Emile Quenardel has been placed in charge of all land forces here. A veterans campaigner with three wound stripes and many decorations, he is every inch a soldier. He was appointed while discipline Some fellow officers arranged a big party in his honor, with champagne and all the trimmings. He called it off.

"When 2.000,000 Frenchmen are prisoners of war it is no time to celebrate." he said.

So they arranged a review in his honor. He set the time at 7 a.m.,

Railroad's Troubles Recall Bonanza of Tonopah's Lush Days

Gold and Silver Strike **Brought Many Millions** To Mine Operators

By the Associated Press.

TONOPAH, Nev., Jan. 1.-A bonanza railroad which links one of the few remaining glamour spots of gold rush days with the outside world will go on trial shortly for its

If it loses, one of the last vestiges of frontier romance will vanish from the business of hard-rock mining in the United States. Its tracks will be torn up, and ore will be trucked across the desert to Salt Lake City or the nearest remaining rail point for shipment to smelters, and Tonopah will be just another inland mining town.

The Tonopah "strike" of May 17. 1900, blossomed into a working man's gold rush-a place where, for a while at least, a hard-rock miner could start on his own with nothing but a pick.

In the first two decades, Tonopah's real boom period, the miners took \$120,000,000 worth of gold and silver out of its desert hills. Without, even the scratch of a pen or pencil. James Butler, the discoverer, leased claims to the working miners Their word was their bond. They paid off on a 25 per cent royalty arrangement

They paid \$1.50 a barrel for water, \$15 a cord for wood, \$2.50 for 100 pounds of hay and \$20 a ton to have their ore hauled 60 miles to the nearest railroad. When they worked for somebody else they got \$4 a

Gold ore. 10,000 sacks at a time, stood in the street, unmolested, awaiting shipment.

There was little lumber to be had, and that little was sky high in price. Miners built houses out of barrels, gunnybags, tin cans and even bottles. A sizable residence built with glass bottles and mortar was one of Tonopah's show

A year after the discovery Tonopah had 1,000 or more residents, was supporting 32 saloons, 2 dance places, 6 faro games, 2 weekly newspapers, 2 churches and a public school. In that year it experienced only one stage robbery.

"It is," said a 1905 report to the United States Mint, "a very orderly

Butler was an easy-going miner who had been working in a more northerly community then called Sodaville. For no particular reason he went on a trip southward across the desert to "the Southern Klondike," a mining community 70 miles from Sodaville.

At a spot called Tonopah, an Indian term for a scrubby desert plant which is supposed to indicate the presence of water, Butler broke off a few pieces of curious looking rock cropping out of the desert. Reaching Southern Klondike, he asked an assayer there to test them for value

When the assayer learned where the samples came from, he let them lie, thinking they were not worth

New Medical Director For Selective Service System Is Named

Four Officers on Duty At Headquarters Here Receive Promotions

Appointment of a new medical director for the selective service system and promotion of four officers on duty at national headquarters were revealed today.

The new chief of the medical division is Col. Leonard G. Rowntree, Medical Reserve Corps.

Lt. Col. Victor J. O'Kelliher, officer of the Advisory Committee on Selective Service, becomes a colonel. Advanced to the rank of major are Capts. Ernest M. Culligan, public relations officer; Richard P. Davidson, assistant chief of the man power division, and Gareth N. Brainerd, chief of the field section.

Rowntree Taught at Hopkins. Col. Rowntree is widely known for his medical research. He devised several tests, now in general use, for determining kidney and liver conditions and changes in the blood. He formerly was associate professor of medicine at the Johns Hopkins University and for 16 years held the chair of medicine at the University of Minnesota. He also has served as chief of the medical division of the Mayo Foundation and as senior medical consultant and director of clinical investgiation at the Mayo Clinic, Rochester, Minn.

A native of London, Ontario, he took his medical degree at the University of Ontario in 1905 and had six years of graduate training at the Johns Hopkins Hospital. During the World War he was a lieutenant colonel in the Medical Corps and served in France as executive officer of the Air Service Research Medical Laboratories. He is a past president of the American Society of Clinical Investigation and the American Society of Internal Se-

At selective service Col. Rowntree succeeds Lt. Col. Charles B. Spruit, U. S. A., who has been assigned to the War Department general staff.

O'Keeliher Served in 1917 Draft. Col. O'Kelliher, who holds a commission in the Specialists' Reserve. is a graduate of the University of Wisconsin and a lawyer. In 1917-8 he was national draft inspector under Maj. Gen. Enoch W. Crowder, the provost marshal, who was in charge of selective service. Col. O'Kelliher has been a student of selective service ever since. Previous to the adoption of the Selective Service Act of 1940 he was a member of the Joint Army and Navy Selective Service Committee.

Maj. Culligan, who formerly was a public relations counsel in New York and later held a similar post in the United States Housing Authority, began his military career as a private in the 258th Field Artillery, New York National Guard. He was commissioned a second lieutenant in 1928 and made a captain in the Specialists' Reserve in 1940. Last year he was on the artillery maneuvers in the South as a first lieutenant of field artillery.

Davidson a V. M. I. Man. Maj. Davidson is from Cooperstown. N. Y. He is a graduate of the Virginia Military Institute. He is in the real estate business. He holds a commission in the Specialists' Reserve.

Maj. Brainerd is from Denver. where he has been in the real estate and insurance business. He is a graduate of Oberlin College and was commissioned a captain in the Specialists' Reserve in 1936.

WOODWARD & LOTHROP

Important: To Home Owners Both Present and Prospective:

"Window-conditioning" **Double Glass Insulation**

is one of the most important steps you can take to complete home comfort

With regular single-pane windows, your rooms are exposed to drafts and chill . . . definite heat loss with consequent higher fuel bills. With "Windowconditioning"—sealed double - glass insulation drafts are a thing of the past . . . heat loss is cut to a minimum . . . fuel bills decrease with resultant savings. Gain double protection at your doors, too,

Telephone District 5300 for further information about this investment for your home, that makes it a pleasurable Winter haven.

MANUFACTURING DIVISION OFFICE, SEVENTH FLOOR.

DOROTHY CRAY SPECIAL DRY-SKIN MIXTURE

You Save More Than 1/2 on Each Jar

Tomorrow, January 2nd, through Saturday, January 18th

Richly lubricating night cream. Famous for smoothing skin that is flaky-dry from exposure to heat, cold, wind, dust. Special Dry-Skin Mixture coaxes skin to feel pliant, look beautifully soft. Do buy your supply now while it is less than half price. TOILETRIES, AISLE 13,

WOODWARD LOTHROP

Perfect "Go South ... Wear Later" Jacketed Dresses

\$16,690,000 in Aid Sent War Victims by **American Red Cross**

Britain Leads 9 Nations Receiving Benefits With Nearly \$9,000,000

War victims in nine nations received relief through the American Red Cross during 1940 totaling \$16,-690,000 in cash and value of supplies, a report released today re-

Great Britain led with \$8,972,000 and was followed by Finland, \$1,-879.000; France, \$1,838.000; Greece. \$1,069,000; Poland, \$996,000; China, \$923,000; Canada (hospital in Great Britain), \$70.000; Norway, \$45.000; Belgium (for Belgian refugees), \$57,-000, and Netherlands, \$25,000.

"The greater part of the relief supplies already has been distributed, although shipments now are en route to Great Britain and China," the report declares. "A ship is about to be loaded for Greece, and further shipments for Finland will go forward at an early date."

'A total of 1.944.387 garments produced by Red Cross chapters and 16.861,505 surgical dressings also were shipped in 1939.

The \$16.690,000 nine-nation relief total included \$4,803.000 in expenditures and commitments by the

Additional expenditures listed include \$11.272 to Swiss Red Cross NEWFOUNDLAND DOG. black, vicinity for refugee feeding in Switzerland, \$300,000 for blankets, not yet allocated; \$53,000 in assistance to the International Committee of the Red Cross and the League of Red Cross Societies in Geneva, \$100,000 for child refugee relief, \$42,000 for the and information service

Martinsburg Exceeds Christmas Seal Goal

MARTINSBURG, W. Va., Jan. 1 TROY, N. Y.—Russell Sage College (Special).—For the first time in the long series of annual campaigns, the ing program for women favor the Berkeley County Christmas antitube culosis seal campaign not only When registration was conducted concluded Christmas Day, but went for the college's training program over the \$1,300 goal by \$20, ac-143 girls chose the division of every- cording to a report yesterday by was emergency nursing, with 133 handled the campaigns for a number of years.

Bedtime Stories

By THORNTON W. BURGESS. Of all the people who wear fur coats none is more clever than Old Man Coyote. Old Man Coyote has always lived by his wits, just as did his father before him, and his father's father, and his father's father's father, and so on way back to the first of the Coyotes. The more wits are used the sharper they grow, and this is the reason that of all the people in fur none is more clever than Old Man Coyote.

Now wouldn't you suppose that as soon as he saw that Black Pussy was safe up in the tree he would nave given up hope of catching her? He couldn't climb the tree himself. Of course not, Old Man Coyote's claws are not made for climbing, so it looked as if he hadn't a chance in the world of catching Black Pussy, for he is smart enough to know that Black Pussy certainly wouldn't come down out of that tree of her own accord until she was absolutely sure that the way was clear.

But Old Man Coyote had discovered something which Black Pussy herself did not know. You see Black Pussy was not interested in the top of the tree. Her eyes were fixed on Old Man Coyote down below, and she had no thought of anything or anybody else. But Old Man Coyote, looking up, saw something above Black Pussy which made him grin more than ever. What he saw was a funny looking fellow close up to the trunk of the tree near its top, gnawing away for all he was worth. Who do you think that funny fellow was? Can you guess? It was Prickly Porky the Porcupine.

"Ah!" said Old Man Coyote to himself. "Ah! I think I'll stay a while. Prickly Porky is a queer fellow and the most independent chap I know of. He will do just whatever he takes a notion to do, and no one can tell what that will be. He may take a notion to come down out of that tree any minute, and if he does something is going to happen. That cat will have to come down whether she wants to or not. I haven't a single thing to do. and I may as well wait here as somewhere else. I'll just have a little patience and we will see what we shall see.'

So Old Man Coyote went off far enough to make Black Pussy think she had a chance. At least that is what he hoped she would think There he squatted down to watch and wait. Meanwhile, Black Pussy crouched in the tree, and above her Prickly Porky continued to strip off the bark of the tree and chew it in his slow, easy-going fashion, quite unconscious of what was going on below him.

POINTS FOR PARENTS

By EDYTH THOMAS WALLACE. Set up improvement as a goal, rather than perfection.

"This is my New Year resolution. I'm going to try and do

less worrying."
Father: "I'm glad you said 'less' instead of 'no worrying at all,' mother. You may be able to keep

Father: "You said that last year and then went right on worrying about everything."

SONNYSAYINGS

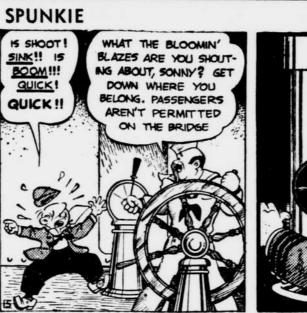

it just hatched out. Well, it dest hatched out in time for the New

Hailstones large as hens' eggs battered many vultures to death as a flock tried to escape from a storm near Petrusberg, South Africa.

THE CHEERFUL CHERUB made some good resolves this year Just as I've always done . I'm glad I never keep

North Pass Dbl. Pass

We think that it's a very close and, in one respect, a very curious question. If the slam is to be bid at all, we think that North must extend the invitation. He knows that South cannot have better than jacks in either spades or diamonds and should make it possible for South to bid the slam if he has either ace or void in hearts or clubs. But surely South cannot be expected to take further action when North passes the four-spade bid and when East doubles five spades! The curious feature of the hand

is that the finger of suspicion has not even been lifted to point at the real criminal. Look at the hand again and decide for yourself who the real criminal was.

West was the criminal, and he committed three crimes! To begin with, he should have jumped to four hearts at his first chance to bid. His hand was pretty fair in stone's partner and, with both sides support of a heart contract, but vulnerable, you hold the same hand defenseless against any other; and once again. But the bidding is: the jump might have given the Jacoby opponents a little trouble. Having failed to jump, he should have rebid at each of his other two chances. A non-vulnerable heart contract row.) could not be severely punished—even if East and West had to sacrifice at seven hearts—and would have

Don't Take My

By FRANK COLBY.

Helpmate

Noun. A companion; a wife.

Ministers especially will find HELPMATE to be the surprise word of the week, all the more so if they have been accustomed to pronounc-

ing the word as "HELPMEET." Both helpmate and helpmeet have grown out of a corruption of an expression found in Genesis ii. 18. The Lord, pondering Adam's loneliness, said: "It is not good that the man should be alone; I will make

him an help meet for him." Meet, in this passage, is an adjective meaning "suitable, fit, proper, appropriate." Thus we see that the literal meaning is: "I will make him a helper suitable for

Meet in this sense is used elsewhere in the Bible, notably in Luke xv. 32: "It was meet (proper) that we should make merry.'

Helpmate, despite its irregular origin, is now sanctioned by most dictionaries. But helpmeet is dubious indeed, and I should advise against it in both speech and writing.

Correct pronunciation: **HELP-mait** (Capitals indicate syllables to

Hedy Lamarr Breaks Bonds Of Being One More Type

'Comrade X,' at Palace, Shows Star As Having a Comedy Talent Beyond That Previously Suspectable

By JAY CARMODY.

It was a brave new world that Metro-Goldwyn-Mayer found for Greta Garbo in "Ninotchka." one in which a Russian background permitted Miss Garbo to be a comedienne after all those beautifully tragic years. Well, it is the same brave new world that the studio finds now for Hedy Lamari in "Comrade X." Palace's new attraction. Miss Lamarr, who has been a figure-well, sort of just a figure-on the screen, also turns out to be a person who can get her laughs when *

the script permits. With Clark situation but upon Hollywood, which Gable offering the kind of assistance

co-starring female. Miss Lamarr demonstrates that she is a much better rounded actress than her previous pictures have indicated. There is fun, in a wacky sort of that makes it a bright, agree-

Jay Carmody. a ble. satirical thing if not one of the truly inspired comedies of a season that needs

That refreshing turn of mind which makes one look for the name of Ben Hecht as author, or coauthor, of a script is apparent throughout "Comrade X." And, quite logically, the name of Hecht Lederer, of this particular story. Patently, he is the writer on this project who thought how amusing Miss Lamarr as a streetcar motorman in Moscow, juxtapose her against Gable as an American newspaper correspondent. The result is not merely a satire on the Russian

"Comrade X" is a tale of two people in one city. The two people are an American newspaper correspondent agile enough mentally to outwit the stern Russian censorship with officially unprintable tales and a beautiful daughter of the revolution who goes so far in her social philosophy as to wear men's clothes and call herself Theodore Gable, obviously, is the newspaper man, Miss Lamarr the d. o. r. who becomes a motorman taking the proletariat home at night and to work in the morning.

The script writers have allowed their imaginations to run somewhat riot in writing "Comrade X." Thus freed, the imaginations have gone to some highly amusing lengths turns up as co-author, with Charles the form of dressing Miss Lamarr not merely as a motorman in cap and overalls but, for a few moments, in a nightgown that looks would be to dress the appealing like a precise copy of a sheik's tent. Beneath this ironic wardrobe Miss Lamarr turns out to be a sort of cavewoman, the kind of female who acts like a person who knows her Marx better than she knows her Shelley, but not too much better. She never has had so much fun in a movie before, and audiences are likely to seize the occasion to wipe out the memory of that strange. none too good picture. "Ecstasy," which resulted in her employment in America.

'Santa Fe Trail,' at Earle, Dramatic Bit of History

Flynn-De Havilland Screen Drama Is Story of Zealot John Brown, Not Just Another Western

Another installment of the movies' course in history made easy and dramatic is to be found at the Earle this week where "Santa Fe Trail" is the new screen attraction. That one, starring Errol Flynn and Olivia DeHavilland, may sound off-hand like one more tale of bridging the continent with a railroad. Actually, it is nothing of the kind. It is rather the story of John Brown, the most fanatical and spectacular of the abolitionists who sought to drive the *

United States into civil strife that there might be a settlement of the ficialdom with a Gable-like flair, slavery issue. Considerably re-Gable also has an effective part in moved from the category of one "Comrade X." And such is the art- more Western picture, "Santa Fe fulness of the writing of the picture | Trail' is a thrilling excerpt from America's colorful past which sticks close enough to the record to be illuminating while it goes about Russia's dumbest citizen, a valet, its major purpose of being enter-

Ginger Rogers Brings 'Kitty Foyle' to Life

THE EVENING STAR, WASHINGTON, D. C., WEDNESDAY, JANUARY 1, 1941.

Her Portrait of Morley's Heroine Makes New Film at Keith's Something to See

By HARRY MacARTHUR.

If there is any one about who still thinks of Miss Ginger Rogers as just the cinema's No. 1 dancing girl, here is "Kitty Foyle," the new picture at Keith's, to alter that opinion. Miss Rogers has come to us before with her mood not a dancing one and her feet not tapping, to be sure, but it is now as the heroine of Mr. Christopher Morley's story of a woman's heart that she shows herself to be truly an actress. She may not be a great actress, belonging to the ages. but she is a lass who can breathe ticular one of life's tragedies is fic-

life into a role such as—this one is. tion. Kitty Foyle, of course, is a girl old story when it was set down as after any actress' heart, for she is "Romeo and Juliet," but it still is a girl whose story talks to any heart. an old story that can bring a lump Kitty's life, as any one who read to the throat when it is told as convincingly as Mr. Morley, Miss

the novel knows, was no dream come true." There was a dream, all right, Rogers and Director Sam Wood tell but it was a dream that went the it in "Kitty Foyle." Girl meets boy, way of so many dreams, even as yours and yours. She is not a completely tragic figure, to be sure, this Philadelphia families—one of those young lady of Mr. Morley's story; rather she is a completely human figure, a girl whose sense of humor and whose balance are not lost when her heart is. It is a role many an actress might cherish, but it also is a role in which many an actress might find herself merely entangled. the screen under Miss Rogers' tender

Miss Rogers is not entangled. She ministrations and with Dalton s so sure always, always so exactly Trumbo's adriot translation of the right that one shouldn't even talk novel to guide her. Rush Operations Held Inevitable Through Year

More Jobs and Wages, **But Modest Profits**

More goods will be produced in 1941, more people will be at work, more money will be paid out in wages and salaries than in any previous year in the Nation's his-

But this boom, if "boom" should call it, will not swell on any buoyant tide of business confidence. Business and industrial earnings will be steady and substantial, but taxes and the force of public opinion will prevent duplication of the record profit margins of old. Business profits will be conservatively appraised in the stock markets; equity prices may rise, probably will, but the expansive ooom-time atmosphere will invade Wall Street only in sporadic gusts. Nor is the farmer destined to be greatly benefited. The home market will be good. Prices of the big cash crops will trend upward, but slowly. The loss of export markets and the increasing surpluses will keep gains in farm income mod-

market and the effect of the Federal farm program. War Shapes Business Course.

There is another curious facet to his "boom." Although more than 50.000.000 people will probably be gainfully employed at the end of 1941, 3,000,000 more than in the peak month of 1929, there will still be an unemployment problem which the Federal Government cannot ig-

in 1941 is obviously shaped by the war abroad and the gigantic drive at home. Only one development, however, and that one inconceivably remote, would cause a major alteration in the course now set.

Bankers Well Equipped for Prominent Part in Defense Financing

Huge Idle Reserves Remain Pressing Problem for 1941

Loan Demand Gains, **But Bond Portfolios** Still Are Heavy

By H. McM. BUSH.

Cambride Associates Staff. Deposits are still increasing. Gold is still flowing into the United States. The Federal Government is embarked on an enormous deficit financing program. All of this poses to bankers the question of how to employ profitably and safely the tremendous volume of loanable funds at their disposal.

Two principal factors are working for a solution of the problem. First, the impact of the war and consequent domestic armament has. and undoubtedly will continue, to increase the demand for credit. Secondly, the banks themselves have already found a partial solution, at least, in the establishment of modernized loan activities

On the other hand, the large volume of Federal issues and other high grade bonds held constitute a source of danger in case of financial shock, which is not compensated for by the low return provided. Thus the problem of securing a better balance between loans and investments, and the profitable investment of now idle funds is the prime consideration of most bank mana-

One-Third in Governments.

Bank investments in Government bonds have grown sharply in the last 10 years. Such investments now constitute roughly a third of banking resources. Price levels for these and other high-grade bonds uation has been brought about by steadily since the first of are vulnerable to sudden shifts in war and domestic rearmament. financial confidence, so that a sudden drop in principal value of 10 per cent is not impossible for longer

In the last few years, when declines approaching this magnitude have occurred, Government controls have been powerful enough to rapidly reverse the trend. It is probable that if they occur in 1941 they can again be checked by Federal action. However, the supply of Government securities is constantly increasing and the law of supply and sound long term growth and can do demand implies that maintenance of more toward re-establishment of that our savings deposits have not see quite a drastic reversal of this high price level may become in- public confidence in the banks than kept pace with the demand or check- situation. Money Rates Likely To Change Little In Coming Year

Larger Credit Needs May Affect Interest Moderately

By Cambridge Associates.

As long as some semblance of a free economy operates it can be taken as axiomatic that interest rates are going to rise. The problem is whether this rise will take place in 1941 or later. The probabilities as now seen, do not indicate that much change will be witnessed

Certain forces, however, are stirring which might throw the most careful calculations out of gear. Most important of these is the sharp increase, now developing, in the demand for bank credit. This could easily turn into a broad credit expansion, which would test the efficacy of Federal monetary controls. In order to examine staisfactorily the outlook an understanding of the factors contributing to the present record low rental value for money is essential.

Most important among these is the extremely large bank reserve in excess of the basic legal requirements for adequate protection of deposits. As loan demand is relatively light and as gold-the basis for credit supply-continues to flow to the United States, such reserves remain at levels sufficient to allow huge credit expansion.

Cheap Money Policy Stands. Another factor that must be considered is the Federal Government's cheap money policy. Every financial act of the New Deal has been aimed toward maintaining low interest rates. Thus has made possible the fact that despite the huge increase in the Federal debt since Harry G. Meem, president of the 1933, the service charges thereon are no greater than was the case seven years ago. Through the loaning agencies and the Federal Reserve Bank's open market policy it has been possible to control the he pointed out, was 36 per cent more market for Government bonds so that their prices have reached successively higher levels. A third point than any other large city in the to be borne in mind is that during said, "to find a corresponding in- been increasing, demand therefore has failed to expand materially. As mand, prices have declined

only regret," he added, "is the fact Another 12 months could easily ing accounts, due undoubtedly to large increase in the demand for ament program should result in a credit on all fronts. In fact that demand appears to be at the point, even now, where it is increasing faster than is the supply. If, as banks to reduce the rate formerly tinued the supply of loanable funds should begin to decrease. In such a case a stiffening of money rates should soon follow

Moreover there is good reason to believe that gold imports may be reduced as a result of the European conflict. France from whom we have imported much gold in the past is now removed as a supplier of the yellow material. England is now raising the question of credits for future purchases here and already we are making loans to South American countries

Controls vs. Credit Demand. Government controls have worked in the past few years when any tendency for money rates to "Our bank, in common with the change became evident. Money for Factory Expansion Is Flowing Again Into Industry

New Security Issues To Finance Vast 1941 Projects

Banks and Corporate Surpluses Provided Money in 1940

Py Cambridge Associates While the attention of the American public was focused on plant expansion during 1940 to a greater degree than for several years, the program had little effect on issue of new securities. This was mainly because the expansion that was undertaken was financed largely through banks, or through dipping nto surplus corporate funds. But the coming 12 months will without a question witness a revival in the finance of new enterprises via the security markets which will dwarf

any recent year. Peak of the post-depression revival of new capital issues was in 1937, when the total reached \$1,225,-012 000. This followed the banner refunding year of 1936, when a total \$3,416,995,000 of financing was completed with low coupon issues replacing 5, 6 and 7 per cent bonds Historically large-scale refunding movements have always preceded the investment of new capital in business; both thrive on low interest rates, but business takes advantage of them quicker for refunding than for new ventures, bethe latter wait upon the growth of the spirit of enterprise.

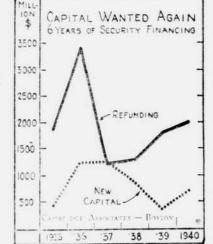

New Issues at Low Ebb.

In the first 11 months of 1940 new capital issues totaled \$660.799.-000, which was the second smallest in five years. The recession year 1939 produced only \$371,250,000, although the total of refunding issues in that year scored close third to 1936 and 1940. Present industrial production, however, is at a neak for the decade and, according to some indexes, for all time. It is only a matter of time before the pressure for expansion of the Nation's productive plant will make is mark on these totals

Terms of the defense tax bill are less discouraging to small entersince earnings must reach \$300,000 above "normal" before the surtax reaches the maximum 50 per cent (in addition to the 24 per cent normal levy). Inventories Register **Smaller Gains Than Order Backlogs**

Manufacturers Busy Assuring Plants of Adequate Supplies

By Cambridge Associates. One of the manufacturer's chief dreads in a period of prosperity is that he will be "caught long" with surplus stocks of raw materials and finished products when the decline comes. In this condition, he is at the mercy of competitors who buy in a falling market and produce for less cost. At the end of 1940, the chances of being caught long" were slim, indeed, Plays Vital Role

for the average manufacturer. It is true that inventories have expanded in the past year. But the amount of that expansion is not as great as the expansion in general business activity in the same period. And since the average manufacturer has a backlog of orders which will take him through several months of production, his concern is mainly the problem of assuring himself that a supply of raw materials will be continuously

Real Expansion in 1939.

a 10 per cent rise had been chalked up by consumption and durable goods alike. A substantial part of this inventory accumulation was financed by means of loans from banks, as reflected by an increase in the recorded total of commercial loans by members of the Federal Reserve System in 101 cities of approximately \$700,000,000.

Since that time, however, borrowing has shifted in character. The \$450,000,000 increase in commercial loans during 1940 was a slow and steady growth representing, in large part, financing of new additions to existing productive facilities, and, in lesser part, the refinancing of securities outstanding in the hands of the public for the purpose of obtaining lower interest rates.

per cent on long-term Government a crackpot soothsayer.

Marvels of "Managed Money."

This financial marvel has been accomplished by the new conception of "managed money." The extension of Federal powers and controls over the flow of capital and interest rates has become so complete that the Government today, being the only borrower of importance insorar as new money is concerned, can prac-ically dictate the rate of interest it will pay. The Government's power to levy taxes, furthermore, has been an instrument tending to promote a low level of interest rate on Government bonds. These obligations, being tax exempt, have a special attraction to wealthy individuals whose personal incomes, if derived from profits or from interest on most corporate bonds, would be greatly reduced by taxa-

Another group of credit obligations which today are fairly homogenous are high-grade corporate bonds-chiefly utilities and industrials. Although the income from these high-grade corporate obligations is not tax exempt, the search for safety and the pressure of idle money has been so great that such bonds afford the lowest yield in history at the present time, an average group yield of about 2.52 per cent to maturity. The difference of some per cent yield between these and Government bonds indicates roughly Defense Program Lifts the value attached to the taxexemption privilege on the Govern-

War Events Dominate Trading in Stocks **During Year**

Fall of France Started Present Trend to Conservatism

By ARTHUR H. NORRIS,

Cambridge Associates Staff Although at times in 1940 the trend of the business curve and the presidential election seemed to dominate the financial horizon, the broader movements in the stock Britain and, to a lesser extent, the market last year were almost wholly South American nations. related to the fortunes of war as they developed on and over the bel-

ligerent countries of Europe. As has so often been the case in recent years of social change and the national debt rises to levels ises and convictions of people as to the development of the war— sible any future repayment thereof. Furthermore, the cost of living premises upon which investment de- would tend to increase under war cisions were necessarily based- conditions for this country, and unwere rather badly shattered by the

force of events last year. As the year 1940 opened, reaction and do-nothing tendencies in the market place were largely explained in terms of the lack of previously anticipated business from the Allies due to the nature of the so-called "phoney war." At that time most lish people, were supremely confident of the impregnability of the Maginot Line and the superiority of the French Army and general

If anything, investors early in 1940 were impatient for the war to begin in earnest, thus providing the anticipated war orders with which to provide the background for rising common stock prices. The first offensive of the axis powers against Norway was actually greeted by a rally in the stock market as it was rather generally felt that such an rather generally felt that such an offensive across the open water of January Bond Offerings the North Sea would provide an opportunity for the British fleet to Expected to Increase inflict serious damage to the German military machine and German Navy. By the Associated Press.

Invasion Brings Collapse. With the success of the Germans in Norway, previously held conceptions began to be questioned and when, on May 10, the German Army moved against the Netherlands, Belgium and Sedan, security prices collapsed in almost a straight line down the lowest levels since March, 1938. At this point, most people in the United States and practically all of the military experts, having had their illusions about the French impregnability shattered, went all the way over to the side of extreme pessimism. The chances that Britain would survive the expected assault very small, indeed. Actual events, capacity to fight off daylight air at-

prevailing early in the year. Stock Prices Lag.

As the year 1940 closed there has By the Associated Press. the Dow-Jones Average reached a variations. level only 50 per cent as great as that in 1929 and again in 1940, with the same level of business as in the two earlier years, the peak level of Stock Market High Lights 152 early in the year represented only 40 per cent of the 1929 level.

While this relation between business and stock prices does not at first glance seem reasonable, it develops rather naturally, under examination, from the attitude of investors towards the future of the corporate business.

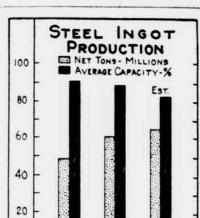

Reflection of Confidence.

In 1929, for instance, the average investor was so confident of the future as it applied to business enterprises, that he was quite willing to pay up to 25 times earnings for leading industrial common stocks. In 1937, however, he was willing, on the same type of stocks, to pay a much lesser number of dollars for each dollar of developed earnings. This changes that seemed to threaten. even at that time, the integrity of the so-called capitalistic system. Thus in 1937 the prevailing capitalization of carnings was something like 10 to 15 times earnings.

In 1940, with business again back to the level of 1929 and 1937, the background of security markets has so far changed, in the estimation of most investors, as to make them unwilling to pay much more than 6 to 10 times earnings for leading common stocks. Certainly the elimination of the capitalistic system in practically every country outside of North America and the implications to its continued existence in this country inherent in the world war, provides some reasonable justification for the prevailing conservative appraisal of business and earnings at what were formerly considered prosperity peaks

War Fear Paramount. As the year 1941 opens some serious questions confront the investor. They stand out as the major considerations in determining investment policy for the new year. First in importance, is probably the possibility that this country may actually go to war. Entrance of this country into war would undoubtedly be an enormously costly undertaking from a financial standpoint alone. The war economy resulting would make necessary the allocation of the major portion of the national income to the military and defense Taxes, which already seem onerous, would have to be increased

Another serious deflationary influence would be a military defeat of Great Britain. This would raise a serious and imminent threat to the security of the United States and, at the same time, would elimiheavy exports now going to Great |

Inflationary Factors Over against these possible deflationary developments must be placed the threat of ultimate inflation as invested dollars might turn out in the long run to be less attractive than the ownership of producing essets like the leading American

corporations' common stocks. Frankly, it is almost impossible forces. With one-man governments countries and with the power of in 1929. decision even in the United States increasingly being concentrated, sewholly unpredictable actions on the holding stocks for long periods, term, tentative attitude toward any commitment they may make.

NEW YORK, Jan. 1.—Public of- ture for several years. ferings of new bonds in January may aggregate over \$200,000,000, the largest total for any January since 1937, dealers predicted today.

Such a figure would compare with offerings totaling \$102,352,000 in January this year, \$22,644,100 in the like 1939 month, and \$68,128,125 in the same month of 1938. Offerings in January, 1937, amounted to

Farm Income Expected to Remain Near 1937 Levels in Next Year

War May Force Shift In Government Aid For Agriculture

Processing Tax Plan Weighed as Substitute For Crop Loans

By EDWARD B. HUBBARD, Cambridge Associates Staff.

Agricultural income in 1941 will probably equal that of 1940, which was well above the average of the last decade and the second highest

expectation that crops will be as final settlement. It seems reasonabundant as in the last year, and able, however, that the United that the Department of Agriculture States, barring the possibility of will continue benefit payments at entrance into the fracas, will be Euleast on the present scale. Both rope's larder regardless of who has these assumptions appear reason- to provide the funds. On this basis, able, barring weather freaks. The the only surplus which is now really department's plan for dealing with troublesome is that of cotton; others the situation, however, is likely to could be quickly wiped out in satisundergo drastic changes.

Outstanding characteristics of the relief through Government loans at fixed prices, and (2) correction of the underlying maladjustments by crop restrictions based on past production. With all its faults, it was the most satisfactory method of handling the farm problem. Was, port bars. A partial offset is the handling the farm problem. Was, that is, until the war entered into the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to the proposal to develop Brazil and Bolivia as sources of products now equipment, nor from all appearances to the proposal to th the picture.

Then it was discovered that belligerent nations were more anxious to devote their slender resources of American dollars to the purchase of products of American industry 1941 Home Building than her agriculture. Other parts of the world where settlement in gold is not necessary are able to Expected to Help of the world where settlement in supply the restricted British need for foodstuffs and fibers.

Crop Loans May Go. Of the current cotton crop, up to November 1, 304.842 bales were exported, as against 1,759,295 bales in the similar period a year ago. Of this commodity, wherein the problem is most acute, Government loans stocks are accumulating to a point where it is evident that some of it will never move out. Normally, half the cotton crop is exported; even the present three-shift schedules in the weaving industry are not able

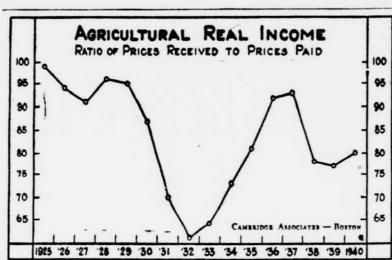

domestic price maintenance has encouraged other sections of the world in some cases taxed their production in order to step up capacity by imto increase output. The solution capacities which is now propsed is the scrapping of the loan program and the substitution of a program which would virtually allow prices to seek their products is even more acute their own level, while domestic users under a defense program and is enwould pay a modified processing larged in its possibilities, by the detax to be turned over to the farmers. sire This would be accomplished by is- Britain in furnishing her war needs. suing certificates to farmers according to their production, these certificates to be redeemed by the purchasers of the commodity.

Steel production capacity under German control has been approximately doubled since the territorial expansion program began.

Early Start Responsible.

The German war effort, of course, began soon after Hitler's accession to power in 1933, and by 1936 it was in full swing. Consequently that country had plenty of time to develop the controls which would assure as little disturbance to normal life as possible during actual hostilities, and the conversion of industrial production to military uses had been accomplished long before September, 1939. Conditions, therefore, have been changed less in the last 12 months only because the large changes took place earlier.

In Great Britain since the beginning of the war, wholesale prices are reported to have risen 45 per cent, and the familiar war pattern of rising costs and wages is beginning to be quite evident. Exports in the first 13 months actually rose 10 per cent, but imports period. Government control over industry has been extended only in on voluntary co-operation. Coal and steel were first, reasonable volume of domestic prothen textiles; other necessities of

Would Take Up Slack First. If war necessity dictates that upon the automobile business." government control shall be exercised over any economic activity, there is no doubt that the government will be ready with the plans, The chances of such a move in the United States, however, even should war be declared, are remote.

The essentials of a huge industrial program are at hand. Labor, raw materials, present or potential plant capacity, and the capital to finance new ventures, are all present in such abundant quantities that a considerable period would be consumed in taking up the slack. Our close approach to self-sufficiency and our huge gold reserve reduce to insignificance the problem of commercial relations with other nations in

Taxes a Powerful Implement.

On the other hand, there is a very good possibility that an early of sustaining the emergency proattempt would be made to release duction needs of a free people. productive facilities now engaged in the production of non-necessities, through penalty taxes. In Canada, the way has been pointed out by the application of a 20 per cent excise tax on domestically manufactured automobiles with a retail of meat and meat food products will value of less than \$900. If the not develop in the meat packing intion of the purchase price above \$900 is 40 per cent, and any portion of the cost above \$1,200 bears an impost of 80 per cent.

Many other items are subject to a flat excise levy of 25 per cent under the new regulations, which were announced in December. The success of this measure in making labor, materials and plant facilities producing automobiles available for defense prduction will be closely watched in this country. Another method of discouraging production of non-necessities, of course, is that of raising income-tax levies in the lower brackets, and compulsory purchases of government bonds according to ability of the individual as measured by annual income and total liquid assets.

"The bituminous coal industry in 1940 has made notable progress ment, and even here there is a of the unemployment problem withand in terms of mine output experienced the best year since 1930. * * The industry enters 1941 with prospects of further increases in mine output in pace with the steadily expanding activity in war industries as well as with increased paredness overcome. Public opinion demands for fuel coal in almost every channel. Mine operations are being geared to meet promptly tioned, as always, upon the suffi-

Production (Continued From Page C-1.)

attitude has been to fear price inflation as much as monetary or credit inflation.

Price Inflation Opposed. The general price level is still below that of 1926, 1929 and 1937. Recent advances have been moderate, hardly recovering the decline jump in the fall of 1939. Excessive wage increases in trades and industries where there are genuine shortages of skilled workers might touch off an inflationary price spiral -just as emergency necessities have because of uneven, unjustifiable Business still can be said to "lack

Packard Reports:

DACKARD, distinguished as co-designer and largest builder of the famous Liberty motor in the war of '17-'18, is already active in the national service.

For more than a year, Packard has been building huge engines for the Navy's newest weapon — the patrol torpedo fleet. These 1350 horsepower giants stem from an aircraft engine design — and are precision-built to aviation standards. Many of these Packard engines have already gone to sea, and many more will soon start their "shakedown cruise."

In the air as well as on the sea

And before long Packard-built motors will be in the air as well

as on the sea. For Packard has been chosen to build the famous aviation motors which power those two swift fighters - Hurricanes and Spitfires. The groundwork for the production of these engines is well under way - and Packard experience will speed their building.

This reservoir of Packard experience - experience in building every type of motor, for everything from tanks to planes - is important. Important to the nation. And important to you, the car buyer.

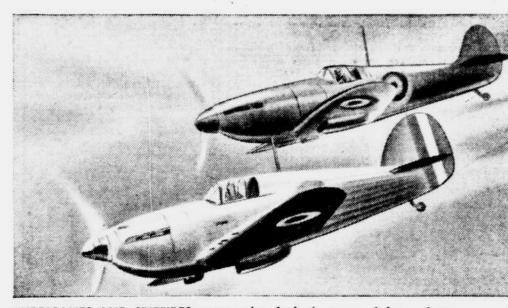

And what about car production?

At Packard, the nation's defense needs come first — have a clear right-of-way. Fortunately, Packard is big enough to handle all of its present defense assignments and its regular job of motor car production - big enough to keep on doing its part for national prosperity, as well as for national defense, at the same time.

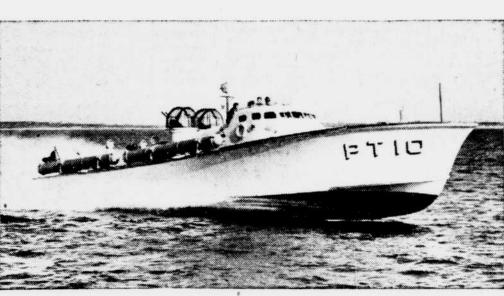

And into its 1941 cars Packard is building the quality and value for which it is just as famous as it is for engineering leadership.

Thanks to this policy, you are assured of a well-built soundly engineered car that has outstanding mechanical ruggedness, as well as outstanding smartness. It is your guarantee of a car that will be unusually economical to run and astonishingly trouble-free.

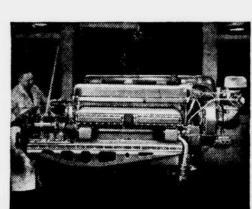

Before you buy any car, look into Packard's record for operating thriftiness and utter dependability. Then drive the new Packard, give it every test you can devise, and we are sure you'll decide it has everything you want in your next car . . . and at a price that makes Packard ownership easy. \$907 to \$5500, delivered in Detroit, State taxes extra.

HURRICANES AND SPITFIRES — two of today's foremost fighter planes — use the Rolls-Royce engine exclusively. It is this famous war-tested engine that Packard has been assigned to build.

THE WATER WASPS OF THE NAVY - powered by Packard. The "Elco" patrol torpedo boat shown above is driven by three 1350 horsepower Packard engines -4050 horsepower in all. Hundreds of these new super-engines will be produced.

AIR ENGINE GOES TO SEA—These new marine super-charged V-12's are really aviation engines - precision-built to microscopic tolerances.

HEIR TO IT ALL - 1941 Packards are heir to Packard's vast experience, and show it. They are marvels of thriftiness and long-lived ruggedness.

PACKARD MOTOR CAR COMPANY, Detroit, Michigan

U. S. Steel Production Is Boosted to Highest Point in History

Program to Increase **Enormous Capacity** Already Started

Increase in Costs May Force Boost In 1941 Prices

By CAMBRIDGE ASSOCIATES.

The steel industry operated at an average of 82 per cent of its productive capacity during the past year. Since mid-September the rate of operations has been steadily above 95 per cent. Over 65,000,000 tons of steel ingots were produced in 1940more steel than in any other year in the Nation's business history

Far from slackening, the demand for steel for America's defense effort has apparently only given a fore-

The 83,000,000-ton capacity which seemed fantastically outsize a few years ago is already viewed as inadequate by defense authorities and the program to extend steel-making facilities has begun.

Producers Cautions.

How much this expansion program will be able to lift steel output in 1941 is problematical. Steel producers themselves are wary of extending productive capacity too fast and far beyond normal need. They point out that for the past 10 years that average rate of operations has been about 45 per cent of capacity and that the average rate for 1932 was under 20 per cent. They know the cost of carrying overbuilt facilities. Immediate plans call for some expansion of equipment, but more look to increasing efficiency and the relief of special situations.

Those concerned with national defense, however, are looking to 1942 and a still greater demand for steel. The National Resources Planning Board recently made public a Emphasizing that the program was put forward merely for criticism and suggestion, the board hinges its proposals to national income. If he national income reaches \$83,000.-000,000, the iron and steel industry would need to put \$316,000,000 in additional facilities. If the national income rises to \$89,000,000,000, somewhat under the board's estimate for 1942. a total of \$720,000,000 should be spent for equipment, the board

Tighten Steel Control Forecast in Canada

OTTAWA, Ontario, Jan. 1 (Canadian Press). — Further measures to assure an adequate supply of steel for defense purposes and urgent civilian needs are forecast by Angus L. MacDonald, acting minister of munitions and supply. according to a statement issued by the department today.

"The indicated consumption of steel in 1941 runs to some 50 per cent more than the total capacity of the industry." MacDonald said. He described the situation in the steel industia as vital to the mainte-nance and expansion of the war effort and declared an increasing amount of steel would have to be diverted from civilian to war purpose in the coming year. The statement quoted H. D.

Scully, steel controller and chairman of the Wartime Industries Control Board, as saying total Canadian steel requirements in 1941 would be 3.100.000 tons while the present rated capacity of the industry was about 2.100,000 tons. Scully added that steps had been taken to overcome, at least in part, this shortage of 1.000.000 tons.

Arrangements were made with the industry for additions both to blast furnace and melting capacity before the middle of the year. Also the government is expending \$5,500,-000 on additions to an electric alloy

Big Year in Advertising, **Ad Club Head Asserts**

Advertising went into high gear in 1940, as business scored new peaks, said G. B. Burrus, president of the Advertising Club of Washington, in commenting on the year's activities. During the year increases in all departments of advertising endeavor were recorded in

the Capital. Newspaper lineage and circulation revealed an upswing, with substantial gains over the previous year, Mr. Burrus added. People in Washington have made great material progress through advertising. The new year appears to hold the same favorable outlook from an advertising viewpoint.

The Advertising Club of Washington has enjoyed one of its best years and is looking to 1941 with great enthusiasm.

Shortages Are Feared As Business Activity Rises Further

By ROBERT H. SMITH, Vice President, Poor's Publishing Co.

As the national defense program gram. is stepped up and becomes more efficient, capacity operations in "inevitably" would deliver the many key industries must be ex- manufacturing capacity of the counpected to continue in 1941. Such try to military production, and that industries as aircraft, machinery, shipbuilding and steel are being will be high and the public will pressed harder for deliveries, and have another joy-ride through a further speedup of production will temporarily increased purchasing mean an even more urgent demand power.' for industrial raw materials and Failure of peace-time goods pro- terials for military purposes, but it equipment. Consequently, producers duction to meet the demand resultof nonferrous metals, chemicals, ing from increased consumer purchlumber and other essential supplies asing power, he added, will bring will be increasingly active.

Thus, an inflated demand for control of prices may result It is evident that the United States is entering upon a period of marked

business activity. Operations are tion of demand has another aspect, discouraging production. that the demand will be so large and so pressing that shortages will While it is recognized that the develop, not from the re-armament while it is recognized that the develop, not from the comvast sums the Government is spend- activities alone, but from the comvast sums the Government is spend- activities alone, but from the coming, and which probably will be bined effect of defense demand for increased, are to fill an emergency goods and the con-current public need, this will likely continue for demand.

Buying Power Grows.

For consumer purchasing power is Moreover, a rising price trend day. feeds on itself, as fear of still high-

er prices develops. Just as the outstanding factor in tions were favorable enough to enthe 1940 domestic economy was able at least 300,000 families to larger taxes and fear of an even build, or to buy newly built, oneheavier tax burden, so are higher family homes. prices and fears of further price increases likely to dominate the 1941 economy. Tax fears will continue in 1941, and more stringent tax legislation will undoubtedly be passed, thus restricting gains in net income, but the amount of money gram, more building should be an raised by taxes will probably represent only a small percentage of the money spent for defense.

Therefore, most of the expenditheir coal dollar and more than has not shown an eagerness that tures of re-armament will be newly \$600,000,000-\$12,000,000 every week reflects an increasing demand for created. And if we add to the -went into the pay envelopes of the needed cash on the part of industry, spending of the Federal Government the buying of Britain, Greece, seven-hour day, five day week, at in fuller swing it is probable that China and other countries (magnihourly wages currently averaging there will be a larger demand for fied further should the United States liberalize credit to Britain), the aggregate demand will be stag-Inherent dangers in the situation

Sharp Advance in Building Activity Expected to Continue in 1941

Construction Awards Climb 40 Per Cent Above Year Ago

Lumber Proves Only Exception to Stable Costs Trend

By Cambridge Associates, If it isn't actually a construction boom it's the closest thing to it the country has seen since 1929. The year-end finds building contracts running about 40 per cent above a year ago and nearly \$2,000 .-000,000 worth of defense construc-

tion work in prospect. Even granting heavy reductions in peacetime heavy engineering projects and no further gains in Barter Methods to residential building it is still possible to see a gain of at least 12 per cent in 1941 construction totals.

Most Costs Steady.

As a matter of fact, higher national income will almost certainly lead to further increases in home in the State of New York in No- markets for her principal exports building unless building costs get wildly out of line. Most building costs have remained fairly steady despite the tremendous activity of the past year. The cost of labor has advanced only moderately, structural steel has remained unchanged and the cost of brick, tile and cement is actually less now than a

Drastic War Changes Bring New Era in Foreign Trade

Important European Markets Closed to Farm Products

By EUGENE P. THOMAS. This war presents aspects so different from those of the previous war that our past experiences cannot be relied upon as a guide to the

course of events in the next two or

In the previous war we maintained our commercial lines of communication with European neutral countries, in sharp contrast to our present virtual exclusion from European markets.

The development in the last quarter century of aircraft has injected a new and powerful force destructive of seaborne commerce.

In the previous war our farm products continued to find outlets in European markets. Our present surpluses of wheat, tobacco, cotton, lard, fruit, together with a wide range of peacetime manufactured goods not essential to the conduct of war, are shut out from their leading markets.

For the time being, these losses in trade that affect so adversely large sections of the country are compensated, but in value only, by the increasing momentum in the production and sale of the weapons and materials of war-now practically confined to British Empire countries, Latin America and China.

Farm Exports Cut.

We cannot, therefore, take a sanguine view of the future, based upon our increases in our export trade during the first year of the

In that year we experienced sharp declines in the following commodities that enter into our normal, peacetime trade: Raw tobacco. chiefly leaf, suffered the severest loss by value, \$77,500,000; passenger automobile cars declined by \$34.-000,000; wheat by \$29,000,000; fresh fruits, a loss of \$21,300,000.

and manufactures thereof also showed a large falling off in exports. It is obvious that compensation In value, owing to increased exports of war equipment and materials. does not solve the problem of how to dispose of accumulating stocks of agricultural and other products shut out from continental Europe and from British Empire countries as wartime non-essentials. Some relief has been afforded the producers by governmental purchases of tobacco, cotton, corn and other farm products, but this interruption to trade—which is likely to continue during the duration of the warconstitutes a wartime problem of

of the war, showing export increases in all geographical divisions, and in an export balance of \$1.391.000.000-an increase of \$582.-000,000 over the previous 12-month period-cover a period when France was a large purchaser, and when European neutral markets only gradually succumbed to the German

war, our freedom of trade is limited in the main to British Empire councritical materials; by limitations on loans imposed by the Johnson Act: Great Britain and the dominions.

with Latin America. Our export trade with the other Americas has

Our imports from Latin America. with Argentina, for example, purchasing power of approximately European markets (of which \$240 .lem we face is one of buying more

an indication of the more intense competition for this trade, as compensation for losses elsewhere. The British trade agreements with these

It is difficult to appraise events in this second year of the war in terms of our international trade prospects. American trade enterprise is so inextricably bound up with primary political considerations relating to defense that no one can foresee what changes in the European military situation may come to ease or further intensify our foreign trade difficulties in respect to the sale of our surpluses of normal peacetime

Manganese Project Pushed

Knowledge that a large, nearby source of manganese was being established to aid national defense was an important consideration in the successful 10-year struggle of Cuban-American Manganese Corp. to overcome engineering difficulties -and setbocks resulting from three floods, an earthquake, a revolution and a 50 per cent reduction in tariff protection-in developing a process for economically concentrating lowgrade manganese ore to the grade required by the American steel in-dusty. Langbourne M. Williams, ir., president, reports.

briefly check up on prospective Govcreep toward the \$1,000,000,000 mark.

tremely difficult to visualize. However, it does not require a stretch of the imagination to assume that this colossal foundation under the business structure will support a prolonged era of outstanding activity which will be modified only to a limited degree in the event of world in the history of the world have so directly or indirectly affects the business situation is carefully analyzed and weighed, it is quite apparent that the outlook is anything but bearish as regards the months directly ahead. Price Trend Narrow.

boundaries. This is nothing new bes cause in the case of World War I prices did not begin to show signs of outstanding strength until the war was a year and a half along. Right here I wish to emphasize the point that the wild gyrations in commodity markets noted from 1916 through 1920 will not be repeated during this war era. Control systems, both actual and prospective. gency. Furthermore, there is an amstrategic commodity, and in the capacity exists. Equally important, the war to date has not interfered with the shipment of commodities volume. In fact, huge reserves are in the process of being built up.

modity prices stood 2 per cent below year earlier figures, 15 per cent under the peak of 1937 and 26 per cent below the average for the year 1926. This comparison clearly indicates that prices are low and well deflated. The need for unlimited production is without precedent.

Gains Are Recorded. Trends portraying employment, purchasing power, earnings, departetc., are inescapably upward. Transportation facilities are bound to be issued an official declaration inaugurating a priority system. Under such conditions there is obviously little room for price weakness, while there is plenty of room for price

ment expenditures vet to be liquidated, it is indeed likely that supply-to-demand ratios will strengthen even though production schedules are steep up to maximum levels. I am fully cognizant of the fear of Government control and price fixing, but no action will be taken until commodity markets reach substantially higher levels than those which prevail today.

> Uncertainty Over War's Outcome Continues For Coming Year

> By H. N. McGILL, Editor McGill Commodity Service. Inc

The paramount question of the hour is, "What has 1941 in store?" Among other things, the following 10 important developments are strongly in prospect: (1) All-time record for industrial

production and consumption in heavy industries, iron and steel building, automotive, etc., will lead $\frac{61_8}{27_8}$ $\frac{13_4}{27_8}$ Earnings will increase in **a** broad manner. (2) Peak levels for employment and purchasing power directly aiding consumer goods industries; new

records for department store sales slowly but steadily increasing cost of production and cost of living. (3) Readjustment of tax laws new sources taxed but generally increasing tax load.

(4) Repeal or modification of the Johnson Act. (5) Sharp increase in the national debt limit, probably to \$65,000 -000.000.

(6) Diminishing activity along the lines of New Deal economic experi mentation. (7) Modification of the Neutrality

(8) Declining trends as regard public relief and farm aid. (9) Greater co-operation between

business and Government due to the 38 urgency of the national defense pro-

(10) Higher commodity prices. Uncertainty Persists. Despite the fact that an all-time record peak of industrial activity now exists, a state of uncertainty

and bewilderment prevails which will not change until the war is over. The trouble is that American industry is on the outside looking in, which is quite a different position from European countries, which are on the inside looking out. How and when the war will end

is a tossup. At the same time the conflict is getting so big and extending over such a broad area that it is likely to collapse at any time under its own pressure. While it 124 may be assumed that the general a prolonged war, nevertheless, peace if only on an armed-truce basis 434 could easily eventuate in 1941. It stands to reason that the future of our economy rests in the lap of the war gods, and hence uncertainty is justified because much depends on which way the scales balance when peace is declared. In this country there is nothing

that can prevent an unparalleled era of activity. This will not be a natural or healthy boom, but primarily artificial, reflecting a na-Vast Program Foreseen.

At this time it is of interest to

ernment spending for national defense over the next half decade. The \$35,000,000,000, which is double the amount already appropriated. The proposed schedule calls for the expenditure of seven and a half billion dollars in 1941, nine billion in billion in 1934 and five billion in 1945. This means that not for four or five years will Government spending again be as low as it is today and two years hence national defense will be the biggest industry in the United States. At least \$500 .-000,000 will be spent monthly during the first half of next year and ouring the closing six months the monthly expenditure will gradually

, War Biggest Factor In Financial Moves During Year 1940

Domestic Business Watches Every Turn In World Affairs

By JOHN L. BECKLEY,

NEW YORK, Jan. 1.-Finance and industry danced to the tune of international events in 1940.

Not since World War days has domestic business followed so closely every twist and turn of world

Industry entered the year with factory wheels turning at a fast pace working on orders carried over from the 1939 inventory boom. Operations slowed down steadily during four months of stalemate on the western front, then picked up to the highest level on record as smashing German victories awakened America to a feverish drive for national defense

a dismal year replete with fears of German world comination, oppressive taxation, tremendous deficits and vanishing private initiative. The crushing defeat of France sent shares tumbling into one of the sharpest declines on record, from which they had but half recovered at year end. Trading volume was the smallest since 1921.

Year's Important Events.

A chronology of important events which shaped the course of business throughout the year follows:

January - Finns inflict severe losses on attacking Russians, Roosevelt budget asks \$1,800,000,000 for defense, \$460,000,000 new taxes, sets 1941 deficit at \$2,000.000.000. Japanese - American commercial treaty expires; stocks marking time; new orders and industrial activity

February-British treasury requisitions nationals' holdings of 60 American securities for liquidation, 10 Finnish defense weakens. Roosevelt signs \$252,000,000 emergency 1 defense appropriation. New orders . down to prewar levels, industrial activity still tapering. Export excess largest since November, 1929. Stock market virtually unchanged.

March-Finland yields to Russian peace terms. Assistant Secretary of State Welles returns from special mission to Europe; Roosevelt predicts no early peace. Stocks gain slightly; factory operations still

Huge Naval Appropriation Passed. April-Nazis seize Denmark; in-

vade Norway, British requisition more United States securities owned by Englishmen; annotance war budget of \$10.700.000.000, the largest ever. Congress passes billion-dollar

Navy appropriation. Manufacturtrial activity levels out. Western front stalemate still holds stock market in rut. May-Allies abandon Southern

Norway, Germany invades Low Countries; breaks through French

cent per pound tariff levy, originally placed on imports for the protection of domestic producers, will be paid by the Government to the Government, thus washing itself out. Then, according to the plan, the foreign copper will be supplied to American users at the prevailing domestic prices—with a profit to the Government. Thus the opening of domestic high-cost mines will be postponed. Each commodity is a problem unto itself and the formula which works so neatly for copper may be entirely 13 the determination is there to handle each commodity in the best

> Up to the present time the only increase in prices that has drawn 10314 - 534 attention and disapprobation is that -113a in lumber and other building materials. Fundamentally, there is no reason for a shortage of lumber, but the suddenness of the demand % 1014 1024 = 34 for the construction of cantonments existing supplies on hand, and the This is probably the reason that no strong action is as yet launched. English Effort Watched.

trouble is that of agricultural prices. of such commodities in this counand have succeeded in filling their our cotton problem is one of everincreasing surpluses, which even a record rate of domestic consumption has failed to alleviate. Grains and hogs are oversupplied also to

Rather than support these prices artificially the Department of Agriculture now expects to allow them cepted by the various farm organiloan program will be scrapped. Net cost to the manufacturer or consumer, however, should be little changed under either system.

Business Likely to Steer Conservative Course

By Cambridge Associates. NEW YORK, Jan. 1 .- As long as our business horizon is flecked with month, just what lurks behind them or what may develop out of this confusing haze, Louis Guenther, publisher of The Financial World,

"It could turn out to be either fair or heavy weather with which industry will have to cope during 1941. Under such uncertain prospects business in general will feel it advisable to hug closely to the shore of conservatism until more definite bearings develop, permitting it to proceed with its forward commitments with a more confident "Of one thing we may feel as-

sured, and this is that industry in 1941 faces an expanding volume, probably far in excess of 1929, when it established a high record of output. But the concealed African in

foreground another imponderable, This is a vital factor in our industrial picture."

U. S. Loans to British Await Evidence of 'All-Out' Efforts

Empire Still Holds Liquid Assets to Finance Orders

By Cambridge Associates.

A fateful decision in international policy will be made by the people of the United States in 1941. For the first time since the era of European debt defaults, which converted billions of dollars of loans extended by our Government into gifts, serious consideration must be given to the problem of further needs.

Present indications are that the United States will be ready to grant credit to the British Empire as and when the need is clearly evident. But stern judgment will be applied by public insistence because of four billions of defaulted obligations now outstanding.

Congressional investigations by the Nye Committee a decade ago examined step by step the American part in financing the World War, from a clandestine beginning as secret authorization by President Wilson, to the point where the weight of credit played a powerful part in our declaration of hostilities. With this voluminous testimony as a guide, public policy should take definite shape at an early point, even though there are many new problems in the present situation.

Await Proof of Sacrifice.

First of all will come an exhaustive examination of the assets available to the empire for transfer or pledging against loans. Among these are American securities, some of which have already been sold, and other liquid assets.

British orders in the United States have reached a total of approximately \$3,000,000,000 without exhausting these most obvious resources. Such exports as have been made to this country have helped.

Future gold production in the African colonies and financial control of business enterprises throughout the world have a value which will be examined. In view of the fact that the granter of credit would be the United States Government rather than individuals or business concerns, any conclusion with regard to these commercial assets must be sourred with the traditional American renunciation of aspirations to empire.

signing fixed assets that an alternative may be chosen. The most likely suggestion yet to appear is for the construction here of shipbuilding facilities with American funds, to be leased to the British for mass production of merchant tonnage, a most pressing need. The yards would presumably be useful after British needs are satisfied. Such a move would conserve British dollar reserves and reduce the need

On the basis of present figures. the actual extension of credit will necessity until late ranged to loan to other neutrals who are suppliers of the British, and who are accepting funds spendable only in the empire. Such a case is Argentina, whose normal imports from England are largely machinery and other items which England has

Consequently, Argentina's foreign exchange from the sale of agricultural products to England is practically useless, and she has no dollar exchange for the purchase of necessary items in the United States. Thus our loan to Argentina relieves the problem of these frozen funds and maintains her position as a British bread basket.

employment of her industrial resources and measures are being applied to restrict consumer demand for household goods, automobiles and other semicapital goods. ports of raw materials for these purchases here, metals and fuels for her own use.

Canal Power Project Broached.

power project will be advanced as an aid to Canada, to be financed by United States funds and operated for the benefit of both countries until Canada is ready to pay her share. The long-range nature of this project, however, will subject it to strong opposition in Con-

agricultural contribution, but also for her large volume of American securities and other assets is Canada Britain's strongest ally. The exchange of goods between the United States and Canada is the largest between any two nations. and before the war that exchange was favorable to Canada, even after debt service. At the present rate of activity Canada will not need American financial assistance in

In Free Enterprise

declared at the year end.

ment that defense comes first. It is not business as usual. It is, rather, the unusual business for America of producing armaments that have priority over all else.

"Despite complete unity as to objective, there is difference of opinmost quickly accomplish that goal. part of some Americans that conscripted and regimented industry America's established system of free industry to build an impregnable

defense for America. "I have serious doubts about the ability of conscripted management and conscripted labor to do a similar job. I maintain that, taking either long or a short view it is vital that enterprise be kept free-that an attempt to conscript industry will delay our defense program and bring

Government Issues At New Peaks Near End of Year Banks Have Handsome Profits in Prime Bonds, Expert States

By PAUL D. GESNER. NEW YORK, Jan. 1.-United States Government securities, in prime demand for investment purposes by banks, life insurance companies and other cash-laden financial institutions, swept upward to

the highest levels in history as war-514 torn 1940 veered toward its close. In the final days of the year some Federal issues tapered slightly from the record peaks, but dealers said the price softening was no sign of weakness. It was, rather, a shading of values as big banks switched from one Government issue to another to

reap realized profits. Paced by the Governments, scores of American corporation bonds, including industrial, utility and railway obligations, also took the upward route in the last half of the year, and many recorded new high for 1940 or longer in November-December trading.

European dollar loans did not do so well. Scores tumbled abrupt giving up 50 to 75 per cent of the market values as German armo forces occupied one tiny indepen country after another in the May

June westward invasion sween, Serious Mid-Year Slump.

In May markets generally tur as Germany invaded Holland, E. gium and France. Obligations German-eccupied countries sank many cases to nominal values of to 12 cents on the dollar. Weak also were many British flag issues, including Australian and New South Wales loans, as German bombs began raining heavily on England Securities of the invaders suffe-

too. Down sharply were German and Italian loans, also those Japan as that Far Eastern nation · aligned itself as a partner in t Berlin-Rome ax

future for 1941.

Any one who refused a year ago to make any predictions for 1940 is even more reluctant to guess at the

Who could have foreseen the occupation of Denmark, Norway, Netherlands, Belgium, Luxembourg, France, Rumania, Estonia, Latvia, Lithuania or Indo-China with al-Lithuania or Indo-China with almost complete stoppage of export Good Prospects for trade in foods

Who can foretell whether or not we shall be at war with Japan, Italy or Germany in 1941? Who can predict whether Britain will ultimately permit food exports to conquered Europe, and who can accurately anticipate the fortunes of war in 1941? Or the character of the weather in the next crop season?

Aside from the well-konwn effects of the defense program reilting in greater consumer buying power, the foregoing factors, all of them unpredictable, are the ones that will control the economic picture in the food industry in 1941. Active Year Foreseen.

We can be reasonably sure of continued defense spending and increased taxation. Business activity will be tremendous in 1941. People of food per capita except the boys who get into the Army who will eat about 1,900 pounds of food per man. Compared to the national average, the Army eats more meat, cereal products and vegetabls, but less milk, fruit and cheese. As business and industry get into high gear, prices of foods may be expected to increase slightly. People who have money to spend may be expected to buy more heavily the so-

profits in 1940, they did not make the spectacular gains found in many other industries. The food manufacturer faces many ramifying problems arising from the unexpected turn of events in the wars n which the blockade of Europe is an important factor

Vast Home Needs Of Nation Cited By Wilson Compton

By WILSON COMPTON, During recent years we have lived in the midst of an almost continuous barrage of exhortations about our national housing condi-The Federal Housing Ad-

ministration has told us we need 500,000 new homes each year for 10 The Department of Labor says 600,000. The President has continue to eat 1,460 pounds told us 700,000. Other official agencies have said 800.000. These statements show the magnitude of the problem and the na-

tional importance of better housing. During 1940 residential construction in terms of floor space, through November at least, was 18 per cent ahead of 1939 and in valuation 15 per cent ahead. The first six months showed a gain of 10 per cent in floor space and the last four months 29 per cent. The first While food companies showed six months showed a gain of 7 per cent in valuation of residential construction, the last four months a gain of 22 per cent.

Healthy Situation Seen.

Total construction valuation is 9 per cent greater than a year ago. These figures show a healthy condition in the building industry and if the current activity progresses and is kept within reasonable bounds the home building industry will have ahead of it at least several years of good business.

The present sharp rise in public building may be traced directly to defense dequirements. But aside from the continued demand of this type of construction expected next year, prospects for 1941 are good.

Construction appears to be one Whenever exports of food shall de- of the more stable factors in the the equivalent of the po- current general business revival, in 1941 over 1940 seems

Research Unveiled Many New Triumphs In Last Year

Nylon, Artificial Rubber, Moving Found Among Current Miracles

By Cambridge Associates.

Back to the days before Don Ameche invented the telephone in 1929. Sales of gasoline in 1940. (source: Groucho Marx), before Paul Muni even began to pasteurize milk, the public was content with one rels over 1939 despite a decrease of industrial miracle a generation. Now, new miracles from industrial laboratories are expected daily as a matter of course. And almost as a matter of course they are produced. Looking over the developments of flection of the substantial increase the past year, the chemical indus- in sales of motor vehicles during try's contributions are, as always the year. With a record registrain the recent records, the most nu- tion of cars at the close of the year merous and far reaching. Despite and the expectation that new car other events of certain historical sales in 1941 will be approximately importance, many women will re- the same as in 1940, economists of lon hosiery came on the market. Presentation of this product, born of coal, air, water, limestone and the wizardry of Du Pont chemists, was a newsworthy event awaited with barrels. almost as many baited breaths as the unveiling of Henry Ford's model A 12 years ago.

First stocks were an immediate sell-out, with but limited number of pairs to each eager customer. First reports from actual users were conflicting; some were adverse, largely because original expectations had been impossibly high. Repeat sales, however, proved public acceptance of this new synthetic fibre and with the new plant facilities under construction total production is expected to reach in two years the volume which it took rayon 11 years to at-

New Fields to Conquer.

The uses of these new products such as Nylon and Vinyon have only been slightly explored. Nylon is already wildly used for toothbrush Vinyon is invading the hosiery field, but its big market is partially brought about by the loss rates will rise and it will be diffiexpected to be in the field of indus- of European markets to South Amer- cult to draw a line between price try for filters and similar uses, In- ican countries. A war is loose in the world. Men and metals must be drafted to meet a dire emergency.

The biggest job aluminum has right now is to help defend America. For that job, this nation needs more aluminum than was ever used before.

To provide that amount of aluminum the industry must now more than double, in a matter of months, the production facilities it had built up through more than half a century.

Aluminum Company of America, as part of the industry, has undertaken to carry out now a program of expansion which in normal times would require two decades.

This company alone is investing over one hundred and fifty million dollars in new factories . . . new mills . . . new machinery ... new dams ... new power projects ... new ships.

From the 1939 all-time annual peak production of 327,000,000 pounds, Aluminum Company of America expects to be producing at the rate of more than 700,000,000 pounds per year before the end of 1942.

But in the meantime, defense requirements come first. As an example, the railroads who use aluminum for streamlined trains may have to wait for the aluminum alloys which would be supplied promptly in normal times. The very qualities which make aluminum desirable for streamlined trains are among the factors which make it so valuable for the defense program . . . and which give defense a prior call on the metal immediately available.

If you find it difficult at the moment to get all the aluminum you want, when you want it, you will know that aluminum has gone off to defend your home and your country.

When we supply aluminum for national defense in this crisis, your business and your family are served in an infinitely deeper sense than if the aluminum actually went to you.

And when the emergency is past, there will be more aluminum than was ever available before . . . lower prices . . . and more ways in which aluminum can serve industry and the nation.

When War Is Done

When peace is here . . . when people and markets are once more free . . . you will see such an upsurge in the use of aluminum as to make this in a very real sense an Aluminized America-lighter, brighter, and more efficient.

What will an Aluminized America mean to industry, agriculture, and the American home?

Some of the things it will mean are still locked in the minds of research men and development engineers. But some are very plainly indicated. In one way or another, they will all grow out of ...

Aluminum's Economic Advantages Here are 12 of them:

Light Weight High Resistance to Corrosion High Electrical Conductivity High Reflectivity for Light and

High Conductivity for Heat

Radiant Heat

Non-magnetic Non-toxic Strength in Alloys Non-sparking Appearance High Scrap and Re-Use Value

Workability
